

Team Discussion

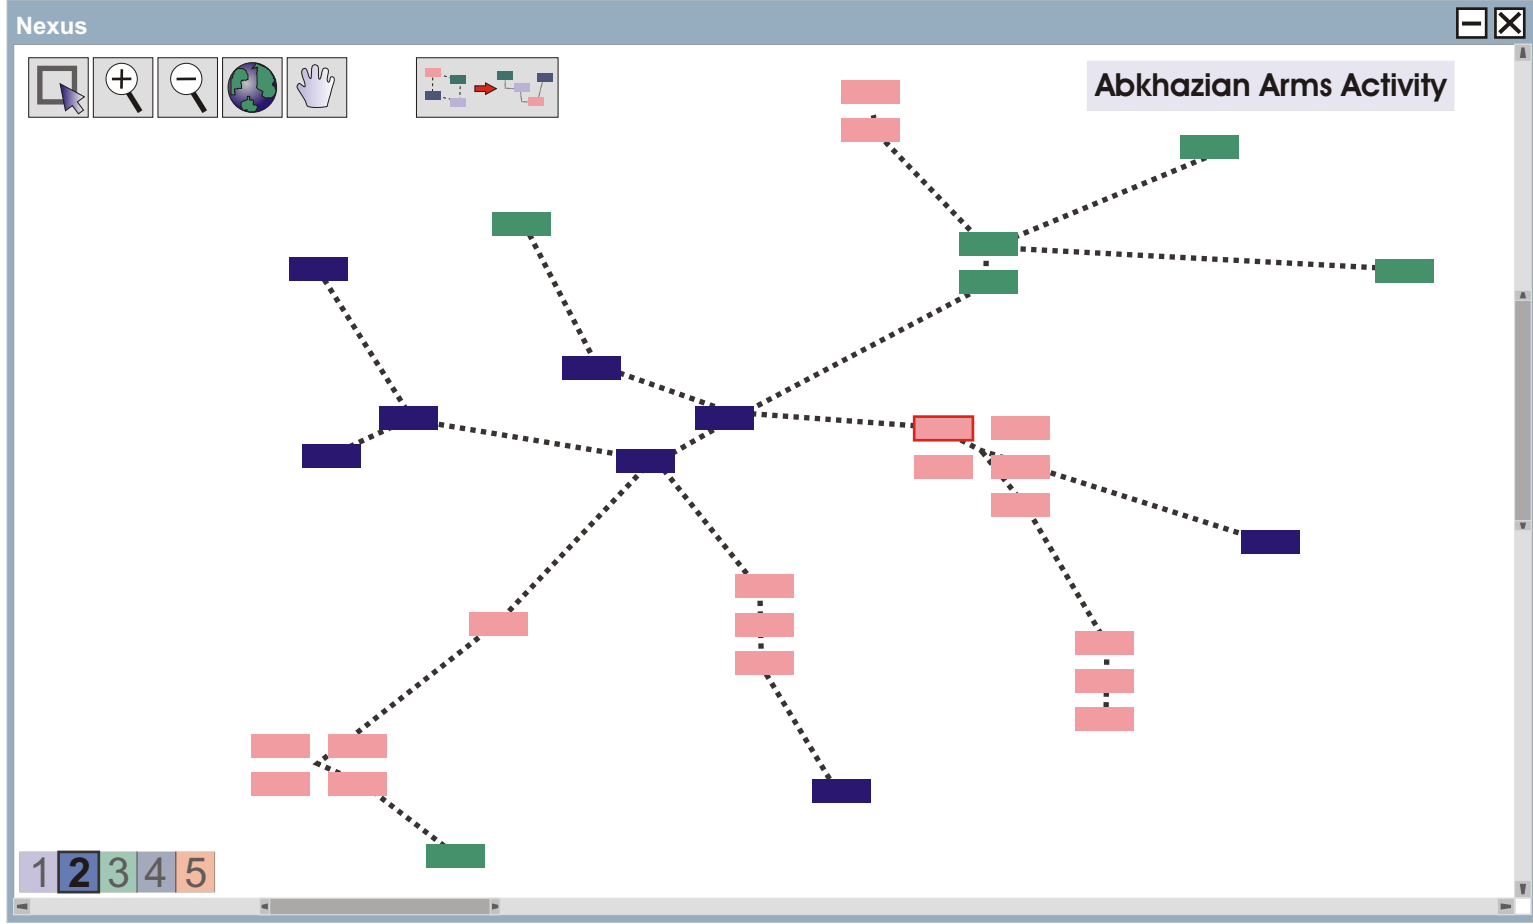

Team 1: We're not comfortable with the reliability of source #74 - What do the rest of you think?

Team 2: I think we're okay with #74, as long as we double check the original materials to ensure consistency with Scenario 3.

Team 1: That sounds reasonable to us. Team 3, are you still there?

We're still trying to make a decision on that here.. Just a minute please.
