Imaging the developing brain

PSY 525.003 • Spring 2010

About The Course

This seminar will focus on classic and contemporary research concerning the structural and functional development of the nervous system. The course will focus largely but not exclusively on human development and will highlight research that involves neuroimaging methodologies. The course is suitable for graduate students in the social, life, and engineering sciences and counts toward the Psychology Department's SCAN minor.

Instructor: Rick Gilmore, rogilmore@psu.edu

Associate Professor of Psychology

Where: 102 Pond

Time: Th 2:30-5:30 pm (may be rescheduled)
