RESEARCH INTERESTS **Mathematical logic, primarily computability theory and proof theory:**
algorithmic randomness, computable analysis, reverse mathematics, and metastability.

Applications of logic to analysis, primarily probability and measure theory:
ergodic theory, potential theory, martingales, graph limits and stochastic calculus.

EDUCATION **Carnegie Mellon University**, Pittsburgh, PA USA *Dept of Mathematical Sciences*

Ph.D., Mathematical Sciences, August 2013

- Thesis: Topics in algorithmic randomness and computable analysis
- Advisor: Professor Jeremy Avigad

M.S., Mathematical Sciences, December 2010

University of Wisconsin, Madison, WI USA

B.S., Mechanical Engineering, December 2004

- Additional majors in Mathematics and Philosophy

APPOINTMENTS **Pennsylvania State University**, University Park, PA, USA *Mathematics Department*

Lecturer, July 2016 to Present

Research Associate, August 2013 to June 2016

University of Hawai'i, Manoa, HI, USA *Department of Mathematics*

Junior Researcher, February 2013 to July 2013

PUBLISHED PAPERS

SELECTED
TALKS

- Computing uniform (metastable) rates of convergence from the statement of the theorem alone. New England Recursion and Definability Seminar, Worcester MA USA. October 2015.
- (Invited) Application of computable continuous model theory to a question in proof theory. AMS Sectional Meeting, Special Session on Computability Theory and Applications, Chicago USA. October 2015.
- Randomness for ergodic measures. Computability in Europe, Bucharest Romania. July 2015.
- (Invited) New directions in randomness. Computability, Complexity, and Randomness, Heidelberg Germany. June 2015.
- Algorithmic randomness and constructive/computable analysis. Varieties of Algorithmic Information, Heidelberg Germany. June 2015.
- (Invited) Randomness, Brownian motion, Riesz capacity, and complexity. Southeastern Logic Symposium, University of Florida–Gainesville. February 2015.
- Randomness for capacities with applications to random closed sets. Computability, Complexity, and Randomness, Singapore. June 2014.
- (Invited) Schnorr randomness for noncomputable measures. Joint Math Meetings, Special Session on Logic and Probability, Baltimore USA. January 2014.
- (Invited) Schnorr randomness and computable analysis. AMS Sectional Meeting, Special Session on Computability Across Mathematics, St. Louis USA. October 2013.
- (Invited) On the computability of rates of metastable convergence. Logic Seminar, University of Pennsylvania. October 2013.
- (Invited) Transformations which preserve computable randomness. Algorithmic Randomness and Analysis, Nancy France. June 2013.
- Ultrafilters and ergodic theory. Arbeitsgemeinschaft: Ergodic Theory and Combinatorial Number Theory, Oberwolfach, Germany. October 2012.

TEACHING
EXPERIENCE

Pennsylvania State University, University Park, PA, USA *Mathematics Department*

Course Coordinator

- Math 231 Calculus in Several Variables Fall 2015

Course Instructor

- Math 141 Calculus with Analytic Geometry II Fall 2016
- Math 230 Calculus and Vector Analysis Fall 2013, Fall 2014
- Math 231 Calculus in Several Variables Fall 2015
- Math 457 Introduction to Mathematical Logic Spring 2014, Spring 2016
- Math 557 Mathematical Logic (Graduate) Fall 2015
- Math 558 Foundations of Mathematics (Graduate) Fall 2014

Carnegie Mellon University, Pittsburgh, PA, USA *Dept of Mathematical Sciences*

Course Instructor

- 21-122 Integration, Differential Equations and Approximation Summer 2011, 2012

Teaching Assistant

- 21-111 Calculus I Fall 2009
- 21-120 Differential and Integral Calculus Fall 2010, Spring 2012
- 21-122 Integration, Differential Equations and Approximation Fall 2008
- 21-123 Calculus of Approximation Spring 2009
- 21-127 Concepts of Mathematics Spring 2011, Fall 2012

MENTORING
EXPERIENCE

- Undergraduate Thesis Supervisor for Justin Miller. Spring 2015 to Spring 2016.
- Master’s Thesis Committee Member for Ryan Wasson. Fall 2015.
- Mentor for Adrian Maler (graduate student of Prof. S. Simpson). Met regularly, discussed research, read papers, and went over his dissertation. Fall 2012 to Summer 2015.
- Supervised an undergraduate Mathematical Logic reading course. Spring, Summer 2014.

PROFESSIONAL
SERVICE

Refereed papers for the following conferences.

- Computability in Europe (3 papers)

Refereed articles for the following journals.

- Annals of Pure and Applied Logic (1 article)
- Computability (1 article)
- Journal of Logic and Analysis (1 article)
- Journal of the ACM (1 article)
- Mathematical Structures in Computer Science (1 article)
- Mathematical Logic Quarterly (2 articles)
- Theory of Computing Systems (5 articles)

Reviewed the following reports.

- “Developing a 21st Century Global Library for Mathematics Research”, National Research Council (142 pages)

Participate regularly on [MathOverflow.com](https://mathoverflow.com), a question and answer site for mathematicians.
