This combination project report and training guide describes the 1984 training program for Peace Corps volunteers in Malawi and includes most of the training materials used during the project. The first half of the package, an administrative summary of the training program, includes the following: a statement of the program's philosophy, goals, and methods; a flowchart listing project staff; the program's weekly schedules; an evaluation assessment model; a list and a map illustrating the sites into which individual volunteers were placed; the project budget; results of a program evaluation and country program review monitoring; and a list of recommendations. The second part of the package details the individual training sessions and experiences that took place during the training program. Lesson plans are provided for the program's trainee orientation sessions and teacher, technical specialist, and motorcycle training sessions. A report on the program's language component and lesson plans from the program's cross-cultural training activities and guest speaker sessions are also provided. Each lesson plan contains some or all of the following: session name, trainer name, number of trainees present, session date, objectives, session location and time, materials needed, training activities conducted during the session, and recommendations for improving the session. (MN)

7. TRAINING IN APPROPRIATE TECHNOLOGY (not submitted)
The goal of this report was not so much to "report" what happened in the program to PC staff...that occurred continually throughout the program. No, the reason, our reason for what we have written here is to provide quality information (and quantity information) to our counterparts in future Malawi Training programs, thus we also reach our highest level by sharing in what you will build.

ROY CLARIANA
TRAINING DIRECTOR
MALAWI 1984 OMNIBUS
PHILOSOPHY, GOALS & METHODS
Perhaps the most important contribution of any training Director to a program is to develop, promote and maintain a valid training philosophy from which every other part can grow or originate from and the Peace Corps, because of what it is and is not, has a very definite training philosophy. The TD must also develop the methodologies and techniques to translate these into reality and this is how personal style can come into the program and flavor the program (for good or bad).

Two key components for an integrated training program are commitment to a philosophy and accountability— which assumes the existence of goals and standards (which might be required of the trainees for selection or may simply be present to guide or direct participants to higher levels).

PEACE CORPS TRAINING IS:

1. An on-going process started during staging and continued throughout the Volunteer's service involving staging, PST, In-service, & COS. The importance of any one of these to PCV service can never be overlooked. (Example: A bad CAST experience can spoil PST, and so on.)

2. An integrated process, with no single component conducted in isolation. (Example: An Appropriate Technology session can be conducted during language class in the language and with cross-cultural elements also occurring. Like the UNDP sisal cement field trip and also Rustys AT cement jars using newsprint/drawings in Chichewa.)

3. A model of the development process which promotes self sufficiency, problem analysis, problem solving and critical thinking.

4. Based on clear program goals (with minimum acceptance levels, in practice though, this tends to be highly subjective and so very hard to apply), which are shared with the trainees. The training process includes mechanisms for immediate feedback and assessment of the trainees.

Peace Corps Training uses methodologies and techniques that show respect for each trainee as an adult possessing varied individual experiences and skills; it builds on these and involves trainees in the learning process. All of these were included in the Omni'84 program.
The methodologies and strategies for PC/Malawi omnibus 1984 also included:

1. Training activities will replicate a typical Malawi PCV experience in terms of processing, problem solving, and self-assessment.
2. There is a shared responsibility for success (both staff and trainee), therefore there should be a shared responsibility for the planning and the delivery of the training program.
3. The members of the training community must be willing to listen to the opinions of others, also there should be a sensitivity to the needs of others as well as to their own needs.
4. There must be a high quality and great quantity of communication.
5. All members of the community are Educators (staff and trainee), all members must be continually aware of this.

For Adult education methods to work, the participants must be made aware of the methodology and its requirements and secondly, there must be maturity and responsibility by the trainees.

Though there are basic philosophies of training in PC, these are modified by the personal styles of the training staff, the philosophy of the permanent staff and the training/programming needs of the country. It is of paramount importance that PC/permanent staff take the responsibility to relate their training philosophy and methodologies to the training staff during planning stages and then maintain this throughout the training. In the case of Administrative change during a training, mixed messages can sorely affect the training staff and this should be remembered by new staff members.

The training goals for this Omnibus 1984 included five broad areas: technical, language, health and safety, cross-cultural, and genero.

OMNIBUS 1984 TRAINING GOALS:

TECHNICAL
To give trainees the expertise to function effectively within a Malawian frame work by providing them with information, resource persons and materials related to their fields.

LANGUAGE
1. The trainee will be able to give a dialogue on those things necessary for their survival.
2. The trainee will be able to carry on a friendly conservation in Chichewa on various topics.
3. The trainee will be able to carry on a dialogue about one's profession (in Chichewa).
4. The trainee will be able to distinguish the form of language to use when addressing a supervisor or a junior.

HEALTH and SAFETY
1. Trainee will be able to maintain physical and mental wellness.
2. Trainees will be able to operate a motor cycle on various road conditions— and to know about basic maintenance (as applicable).

CROSS-CULTURAL
Trainees should develop a basic understanding, appreciation and awareness of life in Malawi.

GENERAL
1. To help trainees realize that they are agents of change with responsibilities and accountability.
2. To introduce trainees to Appropriate Technologies and its role in development (in Malawi).
3. To familiarize the trainee with Peace Corps Malawi and Country rules and regulations (including PC goals).
4. The trainees will develop support networks and communication channels in personal and professional areas.

The preceding goals served as a frame to develop specific behavioral objectives and then sessions/activities (which are related in detail in each component section included in this report).

To increase the usefulness of this section on Philosophy, goals, and methodology included are some further ideas from PC higher up:

ASSUMPTIONS UNDERLYING THE PEACE CORPS TRAINING PHILOSOPHY AND GOALS
1. Quality worldwide training requires:
   - a shared philosophy and policy,
   - a common, although minimum, set of standards and appropriate evaluation instruments, and
   - sufficient central management structure to support, maintain and monitor delivery.
2. Since training is a dynamic process, dependent on many variables, continual assessments and revisions are needed.
3. Each country has a staff member who is knowledgeable about and responsible for training.

4. Peace Corps has or can enhance trainers' capacity to deliver integrated training programs.

5. There is a dependent relationship between programming and training.

6. Staff members know what should be included in Volunteers training.

7. Volunteers learning is a measurable item.

8. The adult learning methodologies and techniques used in the integrated training model are ideally suited to achieving Peace Corps Training Goals.

9. Peace Corps training models a specific approach to development.

10. Training is a continuous process.

11. There is continuity throughout the various training events.

12. Training involves a qualification process; everyone interested in Peace Corps does not automatically qualify for service.

This complete ideal of training (philosophy, methods, strategies) was delivered to the training staff (see staff training section) and also to the trainees during the first week of orientation and was maintained throughout the program.

**COMMENTS ON VARIOUS COMPONENTS (and personal goals of TD)**

**TECHNICAL**

The TD was selected by APCD/training after a long interview in May '84 because of the TD'S experiences with PC technical training. PC/Malawi PST have been reported to have had weak Technical training for the past several training cycles and the APCD decided to act to remedy this. It is difficult to provide adequate technical training when the group represents many different sectors. This omnibus included:

- 2 Veterinary Doctors
- 2 Forestry
- 2 Business advisors
- 1 SAV
- 1 Rehabilitation counselor
- 1 Civil engineer
- 1 Fisheries
- 12 Teachers

The final evaluations rated Technical training as the strongest component
of the training. The model designed is sound and based on Adult Education methods. The technical component is written and highly detailed later and should be of significant use by the next training staff. It has been divided by necessity to the Teachers training component and the technical specialist training component.

**LANGUAGE**

In conversations with the APCD/training before arrival in Malawi, he shared with me his goal of establishing a pool of qualified language instructors that would be on call for future training needs before his time as APCD was finished. That left only 8 months and this PST was to be an instrument to provide some of those teachers. A language workshop was implemented in May by a language specialist from Lesotho, Florina Pheko. It was brief and just barely introduced the audio-lingual method but was significant to the program because it identified and ranked the participants. The top five from this course eventually became the PST language staff. Upon arrival in Malawi, I inventoried the language materials and was quite dissatisfied with the available language materials. The TD determined at this time to attempt to develop a standard PC type language manual that could be built upon in future programs. A significant amount of work was put into the language materials development by TD and by the language staff, especially the Language Co-ordinator Mr. Samu. These lessons satisfied our language training goals and can easily be adapted for future use (all included as an appendix in this report). In the last week of training, the TD and APCD had arranged to take advantage of a Foreign Service Institute (FSI) certification workshop. Mrs. Marietta Reed of ETS (Educational Testing Services, Princeton, NJ) provided the workshop over a four day period and included our language staff plus Mike Nyambote, lecturer at Bunda College; and Grace Mkaliaenga, the cross-cultural co-ordinator. The POD, Mr. Faulkner was pleased that there was a way to further build upon these identified language trainers and has committed PC to further training for these and other individuals that can be utilized for language. Development of a permanent group of language teachers that can be utilized for PST and IST can certainly improve the quality of PC training and reduce the number of worry headaches. (Training a group of secondary school language teachers and them helping them form their own language company could be advantageous to all.)
HEALTH AND SAFETY

Several problems arose concerning the medical training. The medical office was in a state of flux during most of the program, the PCMO had finished her tour of duty and was away on leave, a replacement had not been hired and this left a gap that fears could fall into. The trainees at arrival had some distorted ideas about medical care that seems to have been picked up from visiting PCVs during CAST. These fears were compounded and required significant actions to be alleviated. Special medical sessions were scheduled during week 7 after the PCMOs return and also the PCMO spent several nights at the training site conversing with the trainees. The hiring of the new PCMO has also reduced anxiety and complete confidence will be established in time as the volunteers interact with the medical office during their tour of duty.

The motor cycle training pilot project was very complete and well implemented by PCVL Lenny Klinger. A complete report is included later.

CROSS-CULTURAL

Generally the cross culture component was very good but most of the sessions (at least 85%) were just lectures and became tedious for the trainees, also the goals of each session were not well thought out or explained to the participants. Particularly, guest speakers were not briefed on how Americans will respond to their presentation and so most sessions lacked direction. There were at least 40 hours of structured sessions and then a full week of village live-in. A significant amount of information was presented but was served up dry, like a big plate of mazima, and so the trainees did not receive as much as they possibly could have taken. The amount of scheduled sessions should be cut down and prioritized so that there will be less overlap in the various sessions. Also sessions should be facilitated according to standard training practices if they are to be effective with the American trainees, this requires that the Cross-cultural co-ordinator have TOT training before the next program.
GENERAL
Role of the Volunteer in Development and Appropriate Technologies were barely considered, the TD feeling that these would be more timely during an In-service training in 3 months. Perhaps a teachers inservice could occur during the Christmas holiday and the specialist during Christmas or later. Waiting until the Easter break will conflict with the next PST program. If future PST programs occur earlier, the all volunteer conference could be held the last week in September so that all old volunteers can meet the new volunteers in a relaxing environment, the end of fiscal year would have to be considered also.

Concluding: After reading the preceding, it sounds like a gripe session. Certainly there were constraints that occurred that did effect the quality of the training (as there always are in any program) but listing these here may alleviate these in the future. Further, the program was good all around; a lot of new and innovative (for Malawi) ideas were accomplished and can be built upon in future programs. If I had it to do over again would I do it differently? YES, but that shows that we are all learning and growing and there is the excitement that makes training the wonderful experience that it is. Every training is different because the players are different... go and build and take joy as you do!
Art work by PCV
RAY COLLIVER

GRACE

STAFF
The training staff consisted initially of a core which included:

- Roy Clariana  
  TD
- Debbe Davis  
  DTD (PCV COS)
- Lynn Princic  
  Admin(PCV COS)
- Samv Samv  
  Lang.(Lecturer at Bunda College)
- Grace Mkaliaenga  
  Cross-Cult.(Farmer, in Zomba)

Of these, only the TD and the cross-cultural co-ordinator had any previous PC training experience. Three language teachers were in place but also were without experience. I requested and received permission to add a fifth language teacher. These included Dede Kankondo, an instructor at Bunda College; Fletcher Kaiya, a language teacher for the Baptist Mission; Newton Kalengamaliro, a student at Bunda College; and Emmanuel Wiyenza, a student at University and now a teacher at Likuni Boy’s School. The past two PST in Malawi were reported to have been particularly weak in technical and so the TD requested that Robert Devlin be added as Technical co-ordinator upon his COS date.

The deputy TD began preparations in mid June and the TD began work on July 4 (20 days before the arrival of the trainees). Core staff began stuff training on July 16 and language teachers training began on July 19. Site contracts were not finalized and were negotiated by TD and DTD along with planning and implementation of staff training.

During the training period, there was handover of PC/Malawi directorship from Dr. Annamaria Hayes to Scot Faulkner. Just about mid-training, the APCD/training went to Washington and this affected the lines of communication between training staff and permanent staff. On Sept. 7, the Admin. co-ordinator, Lynn Princic was separated from training and this gave added responsibilities to the training staff. During weeks 5 and 6, the Lang. co-ordinator attended a meeting in Europe and this left a serious vacuum in the language component. No member of staff received any salary until six weeks into training. These items above created some difficulties not normally encountered during a training program.

Recommendations for various staff members will be made confidentially to the PCD, and letters of recommendation provided individually at the request of the staff member desiring it.

All staff members worked hard and this is sincerely appreciated. Zikomo.
JOB DESCRIPTION
Training Director:
* Management of all fiscal, cost and budgeting controls and procedures including monitoring of the purchasing of goods and services as well as the accounting, cost reporting and vouchering system.
* Articulate to trainees and training staff the program objectives and the direction of the program relative to the goals of the host agency and the goals of Peace Corps.
* Ensure a complete understanding by the trainees of Peace Corps policy performance objectives, training design and budgetary constraints of the training program.
* Deliver staff training.
* Supervise logistic preparation of all training sites.
* Develop new training material and update the training design as necessary. Responsible for the development of the training design where one does not already exist.
* Assure integration of language, cross-cultural and technical components in all segments of the training program.
* Provide leadership at the training site that stimulates growth and development of teamwork. Serve as a training resource to all members of staff.
* Direct responsibility for implementation of all evaluation systems, assessment processes and selections providing training and guidance on their use.
* Ensure specific planned feedback to trainees on a regular/timely basis.
* Keep APCD and PCO informed of proposed changes in the training program strategy or activity sequence which involve substantial adjustment in expenditure or program direction.
* Provide expertise and leadership in counseling trainees and staff.
* Collaborate with PCO and APCD when writing all early termination reports.
* Conduct regular training progress evaluation meetings with CORE staff submit regular biweekly training reports to APCD.
* Recommend to PCO all trainees that should or should not be sworn-in as PCVs with supporting behavioral documentation.
* Provide PCO with a final report which includes evaluations from the trainees and recommendations for future programs plus any other useful information.
Deputy Training Director:
* Assist TD with all aspects of the training.
* Assume the role of special technical co-ordinator also.
Language Co-ordinator:
* Submit a weekly language report every Monday by noon.
* Submit a final language report.
* Arrange for guest speakers as necessary.
* Take an active role in the design and implementation of the language staff training.
* Responsible for the overall design and implementation of the Chichewa language course.
* Responsible for planning a language syllabus and supporting lesson plans and materials.
* To determine and then execute the objectives in language for the program.
* Assigning classes in terms of students and instructors.
* Arranging for the final FSI examination.
* Work closely with the cultural co-ordinator to ensure integration of the two components.
* Give the language staff personal support.

Cross Culture Co-ordinator:
* Responsible for planning, organizing and delivering the cross cultural sessions
* Will determine the objectives of the cultural component and design sessions to meet these objectives.
* Will submit a final cross-cultural training report.

Technical Co-ordinator:
* Responsible for preparation and implementation of the training schedule in consultation with the TD and Admin Co-ord. with particular emphasis on teachers technical training.
* Monitoring and evaluating training activities and trainees.
* The technical co-ordinator will be required to participate in writing the final evaluations of trainees and assist in the exit interviews conducted with each trainee.
* To assist in the drafting of the final training report for teachers technical training but is not required to submit an individual report covering his work.
* Will be responsible for the planning, implementation and reporting of all aspects (including logistics, field trips, budget, scheduling, site management) in consultation with TD of the two weeks practice teaching program at Mzuzu Secondary School.
Staff training is a very important segment of any training program. Core and language staff were trained separately but covered the same sessions, I recommend that the next program have one staff training for all of the trainers if the numbers are not too large.

Included is the staff training schedule (and also the session plans for each session, hope these are of use, see volume II).

TRAINING CONTENT AND SCHEDULES:
The trainees were given the following learning opportunities:

- LANGUAGE 110 in class hours
- CROSS-CULTURAL 40 structured hours
  plus 6 days of family live-in.
- TECHNICAL 100 hours minimum for each sector (most structured)
- MOTORCYCLE 50 hours minimum structured
- APPROPRIATE TECH/RVDW 15 hours minimum structured

It is not possible to determine the number of hours of informal learning opportunities for each of the various components, but in such a long program there were many. Also it is significant that there were numerous field trips and these always provide learning opportunities.

- MEDICAL 20 structured hours

Included in this section:

1. Training timeline
2. 10 weeks of schedules

MEDICAL SCHEDULE

GOALS:
To equip volunteers with adequate information whereby they may intelligently monitor their own health needs, practice adequate preventative medicine, and assist to a limited extent in medical emergencies that may arise in their areas while they are PCVs.

CONTENT:

LECTURES AND IMMUNIZATION PROGRAM FOR PC TRAINEES

WEEK 1 DAY 0 25/7/84
Lecture - Orientation
a) Adaptation to Weather, Clothing & Culture
b) Personal Hygiene
c) Food Precautions
d) Water Precautions
(1 Hour)
e) Insects & Animal Bites - Use of Insects Repellents & Mosquito Net

Immunizations
a) Anti-Rabies (1)
b) DPT
c) Tine Test
(1 Hour)

WEEK 2 DAY 7 31/7/84
Lecture - First Aid
a) Shock
b) Care of Wounds
c) Burns
d) Fractures
e) Snake Bites
(1 Hour)

Immunizations
a) Anti-Rabies (2)
b) Cholera
(1 Hour)
c) Typhoid (1)

WEEK 3 DAY 14 8/8/84
Lecture - Common Diseases
a) Malaria
b) Diarrhoea
c) STD
e) Infective Hepatitis
f) Medical Confidentiality
(2 Hours)
WEEK 4 DAY 20 14/8/84
Market Orientation

WEEK 4 DAY 21 15/8/84
Cooking Demonstration (1 Hour)

Immunizations
a) Anti-Rabies (3) (1 Hour)

WEEK 5
Village visit, consultations

WEEK 6 DAY 35 29/8/84
Lecture:

a) Medical Coverage
b) Contraception
c) Pregnancy & Abortion (1 Hour)
d) Rape & Assault
e) PCVs Responsibilities for their Health.

Immunizations
Typhoid 2 (1 Hour)

WEEK 7 DAY 42 5/9/84
Immunizations
Gamma Globulin (1 Hour)
A CLASSIC DESIGN

THE ABOVE DATES WILL BE CONFIRMED BY JY 17 AFTER TRAINING STAFF CONSULTATION.
TRAINEE ASSESSMENT MODEL

Mere passage through the ten weeks training does not automatically qualify a trainee to become a PC volunteer. Peace Corps Malawi sets high standards and these were translated to the trainees during the first week of training by both by PC staff and by the training staff, also handouts with this information were given to each trainee. We explained that they are expected to be competent, productive, sensitive, hard working and serious contributors to development in Malawi as well as persons who enhance the mutual understanding and appreciation of America and Malawi. PC expects there volunteers to be exceptional. Merely doing a job or the absence of negative behavior is not enough to be a good volunteer. We emphasized that being good was not enough, that each had potential to be great.

This adopted statement from Training for Development by Marshall and Rodgers sums up what the staff was striving for in this program. Since the trainees participated in a Center for Assessment and Training CAST in the United States before coming to Malawi, we felt that the assessment dimensions used in the CAST model should be carried over and were utilized as the dimensions on which the trainees were rated.

In practice, these dimensions were used for behavior modification and not for the purpose of selection or de-selection. Future trainings can and should consider a stronger approach to the issue of de-selecting trainees. This will require a strong commitment by the Training Director and by the Peace Corps Director to take the unpleasant task when a trainee doesn't meet the minimum standards, this is only of course if this action agrees with the permanent Staffs' Volunteer Philosophy.

The BIG 7 include:
1. Motivation
2. Productive Competence
3. Respect and Empathy
4. Cultural Awareness
5. Emotional Maturity
6. Ability to Adjust
7. Interaction Skills
THE BIG 7

DIMENSIONS***DEFINITIONS***INDICATORS

1. MOTIVATION
2. PRODUCTIVE COMPETENCE
3. RESPECT AND EMPATHY
4. CULTURAL AWARENESS
5. EMOTIONAL MATURITY
6. ABILITY TO ADJUST
7. INTERACTION SKILLS

MOTIVATION

Operational Definition: Although applicants to P.D. vary in their motivations for joining P.C., an applicant's motivation should provide a balance between enlightened self-interest, which acknowledges the gains the applicant expects, and an altruistic-humanitarian value system, which allows the person to fulfill a personal obligation to help others. While commitment is almost impossible to measure by itself, responsibility is an acceptable indicator of commitment and, therefore, is expected to be clearly evident in the trainees.

Indicators:

--Attendance at all training sessions
--Punctuality
--Active participation (relative to personal style)
--Verbalizes a "balanced statement" for joining P.C.
--Preknowledge of country
--Actively seeks job-specific information
--Requests feedback
--Completes all assignments
--Demonstrates willingness to persevere in difficult or confusing situations

Specific Indicators

--

--

--
PRODUCTIVE COMPETENCE

**Operational Definition:** The trainee needs to demonstrate his ability to transfer skills and information to a counterpart or counterparts. This ability requires that the trainee be able to 1) set goals, 2) solve problems, 3) employ effective methods of communication, 4) harness his skills and the available resources in attempting to solve problems.

Training must increase the awareness of the need to problem solve, set goals, communicate, identify problems, seek possible solutions, explore available resources, and analyze or synthesize and evaluate different approaches.

**Indicators:**

-- What the trainee says can be clearly understood
-- The trainee asks appropriate questions at appropriate times
-- He recognizes the full range of the problem
-- He actively initiates problem-solving activities
-- He develops alternative strategies and recognizes the implications of each
-- He exhibits signs of excitement and curiosity about problem-solving activity
-- He copes with ambiguity effectively
-- He asks for clarification comfortably
-- He is comfortable saying "I don't know"
-- He assumes responsibility for helping the group move toward solution
-- He helps the group stay task-oriented

**Specific Indicators**

--
--
--

EMOTIONAL MATURITY

**Operational Definition:** Keeping in mind the stress-producing environment of training, coupled with the unfamiliar environment and culture of Malawi, the trainee is often at a low point of emotional security during training. Behavior in this area can be observed on a continuum relating to Maslow's "Hierarchy of Needs" as the trainee progresses up the pyramid.
The key considerations of this dimension include: 1) possession of a healthy attitude about his/her self, 2) capability to relate sensitively and constructively to a wide variety of people and conditions, 3) ability to recognize and respond appropriately to needs (own and others), and 4) ability to tolerate ambiguity and to function productively in stressful situations.

**Indicators:**

--Takes responsibility for own behavior, does not blame others
--Responsive to feedback
--Avoids being defensive when receiving feedback
--Able to laugh at self
--Able to admit mistakes
--Recognizes and discusses openly own feeling and needs
--Sensitive to others' needs (absence of "I" statements)
--Recognizes own strengths and limitations
--Seeks opportunities to learn more about self
--Awareness of personal tolerance for stress
--Aware of the personal coping mechanisms in use

**Specific Indicators:**

--

--

--

**SOCIAL SENSITIVITY and RESPECT AND EMPATHY**

**Operational Definition:** A healthy respect for self helps generate a respect for others. Trainees who seek to understand the problems and experiences of those with whom they associate (staff, fellow trainees, and HCNs) and who are capable of communicating caring for others, both verbally and non-verbally, should rate a high degree of Social Sensitivity, Respect and Empathy.

**Indicators:**

--Listens attentively to others
--Shows a willingness to consider other's opinions
--Is careful not to violate the personal freedom or "space" of others
--Projects a sense of self-respect through deportment and personal appearance
--Uses language which is appropriate to the occasion and which is unoffensive to others
--Is able to disagree without devaluing or "putting down" others
--Observes common standards of etiquette during interaction with other people
--Does not normally interrupt others
--Avoids stereotyping
--Elicits, recognizes and utilizes others' skills/knowledge

Specific Indicators:

CULTURAL AWARENESS

Operational Definition: Trainees who demonstrate a clear understanding of the make-up of their own culture and who are genuinely curious about Malawi culture and who, finally, demonstrate a facility or potential ability for coping successfully in both cultures are capable of a high degree of cultural awareness.

Indicators:

--Demonstrates eagerness to learn about another culture
--Acknowledges existence and appropriateness of different world views
--Is non-judgmental
--Avoids stereotyping
--Is self-aware in acknowledging areas of possible cultural bias

Specific Indicators:
INTERACTION SKILLS

Operational Definition: The trainee who manages his interactions well will, at various times, demonstrate a willingness to "take turns" in discussions, initiate interactions and terminate interactions based upon the needs of others.

Indicators:

--Takes turns in discussions
--Is responsive to the needs of others for involvement and time sharing
--Considers the wishes of others when initiating/terminating discussions
--Provides equal opportunity for all to share in discussions
--Recognizes signals of others who may want to terminate a discussion

Specific Indicators:

--

--

--

ABILITY TO ADJUST

Operational Definition: The trainee who is observed as strong in this area will demonstrate an ability to adjust to new people, environments, foods, tasks and the "unknown". Flexibility is the key word.

Indicators:

--A willingness to conform to other ways of performing familiar tasks when required
--Through verbal and non-verbal gestures, appears relaxed or at ease in unfamiliar surroundings
--Through verbal responses indicates an attitude of flexibility and not rigidity
--Demonstrates a willingness and aptitude to learn when confronted with a new or difficult situation or set of circumstances
--Helps others to adjust to new surroundings, approaches and resolves unpleasant situations with candor and honesty
--Tries out new behavior, new foods, etc.
--Reacts with little or no nervousness or frustration to new or ambiguous situations
--Adapts rapidly and comfortably to new and/or changing environments

Specific Indicators:

--

--

--
In this program, we stated that we considered the trainees to have already been selected for Peace Corps service since they had passed through CAST successfully. This is a contradictory message and perhaps created confusion and concern in the trainees, to say the least, some were concerned about the selection process and admitted that though it was thoroughly explained and presented with written handouts during the orientation week, they did not understand what was expected of them as training progressed. Again this points up the need to define very specifically the selection criteria and maintain these with the assistance of PC permanent staff. This was never a critical issue and most trainees responded that the selection process was fair (CPR). The change in philosophy with the new administration complicated the assessment process. I feel though that the new volunteers (for the most part) will be good and even great volunteers, some will require a lot of support by the PC permanent staff. Should these have been de-selected, NO.

Finally, the trainees were given a lot of freedom and support during the training program but were expected to take responsibility. This ties in with the PODs philosophy of quality and quantity staff support of the volunteers in the field but then also the volunteers must produce. A fair exchange.

The initial and mid-interviews were formal scheduled events, the purpose was for each trainee to set individual goals and then evaluate or assess their performance on achieving (or not) these personal goals. These interviews were significant in relating to the trainees their strengths and weaknesses and caused significant behavior modification for the trainees as well as useful feedback for program modification. The final interview was a debriefing of the technical component, and asking each trainee for a two year commitment, or reasons why they could not make such a commitment. Two trainees were 'red flagged' for possible deselection, after mid interviews and also unscheduled interviews there was appropriate response and actions on the part of both. No one was listed for deselection.

CONTROL
This budget is the first PST budget developed in Malawi (at least in recorded history) and was written from scratch. If the APCD/Admin can provide final figures from this program for each category to the next years Admin Co-ordinator and TD, it could be possible to fine tune the training budget process.

The APCD/Admin noted that this $66,900 (K 93,660) figure was based upon a training program with 14 volunteer trainees while in fact this program had 22 volunteer trainees. As PC/Malawi grows, these changes in training budget should increase and be planned for well in advance.

Personally, I must note that no cash flow was provided for the program. Cash for the program came mainly as personal per diem advances of members of the training staff. The TD changed $500 to kwacha and even this was not enough for some of the short term high expense cash demands, particularly the practice teaching demanded a large amount of cash on hand. Also, with the training ending on the fiscal year, a very serious money shortage occurred. Training must be moved forward because this is a very serious problem with few alternatives. The Admin Co-ordinator and the TD should develop a cash flow needs chart for the entire program and submit to the APCD/Admin at least 2 to 4 weeks in advance of the trainee arrival, that way sufficient cash can be on hand when it is needed.

Sincere thanks to Mr. Chibambo for doing a very difficult job and doing it very well.

These figures were best estimates prepared by the Admin Co-ordinator during the first week of planning. We closed accounts and open new ones at mid-training to try to determine how we were financially. It appears that the training was within budget at that point. It will probably be November before all final receipts are in for the program and so it is impossible to tell for sure if the program is within budget or not, but it will be close.
On item 3, Lindgadzi Hotel rather than St. John's was used for the final week of accommodation, this figure then will be higher. Also, transport will be high 1) because of the numerous field trip and excursions and 2) the rental of a second vehicle for staff use which was not originally anticipated. Also delivery of volunteers to their sites added an additional 1500 K.

Weeks 1 & 2 perhaps reflect the trainees feelings about leaving home and also their CAST experience which was negative (see CPR-Monitor included). Also, the general feelings and comments suggested that it was necessary to 'prove' that each session was good, otherwise there was a tendency to turn-off. When dealing with older and highly skilled adults, staff must always remember the importance of explaining goals for motivation during the actual session. This was not always done, especially during cross-cultural sessions (with resultant lower evaluation scores for that component).

Week 4 is interesting. I think that concern over the upcoming family visit and continuing concern over the medical component plus staff-staff interrelations and Samus departure can explain this rating.

Week 7 involves the TD style and also events at the site and away from the site that affected training but were not controllable. Specific suggestions will be made in the recommendations section concerning these periods.

Staff evaluation were carried out also, and though confidential and for the use of the training staff only, some general information can be presented:

</tbody>
</table>
The trainees had very high expectations of the training staff and because of lack of adequate preparation time and lack of experience the training staff never met these expectations. Interestingly though, the program as a whole received high ratings (see CPR). Beginning about mid-training, the entire staff professional ratings went down and this was also observed in the program evaluation for week 4 above.

By the end of the program though, the professional rating exceeded the initial rating and suggests that the staff was improving as they gained experience. The training program evaluations are very favorable and suggest that this was ultimately perceived as a good training. I feel that the training staff proved itself in the end.

In looking at the CPR (Country Program Monitoring) two concerns surface:

1) CAST, the stateside staging was felt to be inadequate in all categories, (below 35% positive responses, the issue becomes a concern). CAST received 16%, 16%, 19% and 19% positive responses. There was a definite problem and it did affect PST in-country negatively on several occasions.

2) TRAINING MANAGEMENT (ADMIN. & Logistics), this issue received a 32% favorable response and so becomes a concern. This is partly due to expectations of the trainees about how things should be done and what efficiency is and its importance in a third world setting. Also, I determined at the outset to use the adult training theory completely. This requires that both trainer and trainee take responsibility and act with maturity and frankly, some of the trainees would not. They demanded that I make them be "good" and I would not. The learning environment was created and maintained, the trainees had the responsibility to take it or leave it; I believe that some blame me for what they did not learn and I feel guilt that is associated with that failure. Most of the trainees acted with maturity and learned an enormous amount of information in all areas. Ultimately, I feel that all felt their share of responsibility in the success and shortcomings of the training and the process in itself was a learning experience. (However, next time, I plan to balance flexibility with authority.)

Also in the CPR, several strength areas were identified:

1) OBJECTIVES, the trainees felt that they had achieved adequate levels in all of the components. (Above 65%, the issue is considered a strength.)

2) STAFF, the trainees were positive about language and technical staff performance; 79% and 75% positive responses respectively

3) TECHNICAL, both teachers and tech specialist feel prepared for the tech requirements of their work; at 83% positive responses,
4) LISTENING, 62% was a definite strength of the program that the staff listened to the trainees concerns.

The other areas of the monitor fall between 35% and 65% and are not considered either strengths or weaknesses but can certainly also be worked upon.

Previous training programs in Malawi have been said to have not had adequate technical training. I feel that this training has met this deficiency.

I should note at this point that the role of Deputy TD evolved into a technical co-ordinator role, particularly towards the end of the program and this boosted the technical component scores also. (I would like to see the technical co-ordinator staff training position formalized for all future programs to maintain a high level of technical training.)

COUNTRY PROGRAM MONITORING
TRAINING DIRECTOR Questionnaire

INSTRUCTIONS: Circle the number or letter that best reflects your answer for each item in this questionnaire.

PART 1: THE TRAINEES

1) If trainees were requested to have special language or technical skills (beyond the B.A. generalist level) what percent arrived in-country with the skills below? (If none were requested, circle "NA").
   A) Host country language?
   B) Technical skill?
   C) NA
   D) 55 %

2) What percentage, if any, of the trainees either disrupted training sessions or acted out of class so as to cause negative reactions from host people? (If none, write in "0%").
   C)

PART 2: YOUR TRAINING METHODS

3) Did trainees live with host families for any part of PST?
   YES
   NO
   A) If "YES", for how many weeks?
   2
   1 WEEKS

4) Did trainees visit actual/potential PCV work sites during PST?
   YES
   NO
   A)

5) Were trainees provided learning objectives in each area below:
   A) Technical requirements of their volunteer work
   B) Preparation for cross-cultural adjustment
   C) Host language(s)

PART 3: TRAINING CONTENT & RESOURCES

CROSS-CULTURAL and DEVELOPMENT TRAINING:

6A) How many hours of training, on the average, did trainees receive in cross-cultural and development training?

   Cross-Cultural Training AVERAGE HOURS = 

   Development Training AVERAGE HOURS = 

   Formal

6B) Did you use any of the following instructional techniques in your cross-cultural and development training?

   A) Formal lectures?
   B) Assigned readings?
   C) Role playing?
   D) Cross-cultural exercises performed outside classroom?

6C) Did any of the following participate in your cross-cultural and development training?

   A) Host agency officials
   B) Private host individuals
   C) Current volunteers
   D) Expert advisors (anthropologists, folklorists, etc.)
7) Below is a list of issues often addressed in cross-cultural and development training. Which did you formally cover in this training?

A) Community Health & Nutrition ........................................ 
B) Role of women in host society, family, economy, etc. ........
C) Volunteer roles regarding religious practices ....................
D) Ethnic divisions .........................................................
E) Political structures .....................................................
F) Community organizations & development .........................
G) Host country perceptions of Peace Corps and volunteers ....

**LANGUAGE TRAINING:**

8A) How many hours of formal training, on the average, did trainees receive in language(s) during this training period?

**PRIMARY LANGUAGE:** = **110 HOURS** **SECOND LANGUAGE:** = **0 HOURS**

B) Were language classes ever grouped according to trainee language proficiency? **YES** 2

C) Was the Foreign Service Institute (FSI) Proficiency test used to assess trainee language performance? **YES** 2

If "YES", what were the average FSI scores for:

- Primary Language: **Average FSI**
- Second Language: **Average FSI**

**TECHNICAL TRAINING:**

9A) How many hours of training, on the average, did trainees receive in the technical area of their work? **AVERAGE HOURS = 95 HOURS**

B) Of these total hours in technical training, about what percent was spent in actual field conditions (compared to classroom work)? **85 PERCENT**

C) Did you do any of the following as part of technical training outside the classroom? **YES** 2

- A) Living with a host family ....................................... 1
- B) Working in an actual PCV work environment ............... 8
- C) Field school or field trips to sites ...........................

**PART 4: ASSESSMENT OF YOUR TRAINEES**

10) Were there formal assessment procedures for evaluating individual trainee performance against FST objectives? **YES** 2

11) What was the most typical consequence if trainees failed to meet training standards? (Circle only one letter below)

A) There were no immediate consequences; trainee performance was never judged against any standards
B) Trainees were counseled about their performance or behavior, but no further action was required of trainees
C) Additional training was required, but no one was terminated for not meeting training standards
D) If trainees ultimately failed to meet standards, they were terminated

-11-
KEEPING THE BABY, NOT THE BATH WATER
* Schedule training to end well before the end of the fiscal year.

* Schedule a language session during the orientation week to familiarize the language teachers with the students and the method and to formulate class rosters grouped by ability.

* Continue using the counterpart-trainee workshop to plan the culminating experience for the technical training component for non-teachers. If many different sectors are involved.

* Establish contact with the APCD P&T as early as possible concerning ministry contacts to make possible the timely planning of the counterpart-trainee workshop.

* Establish initial contact by phone with S/C seven weeks before the workshop and follow up with a letter explaining the workshop in more detail at least three to four weeks before the workshop.

* Identify a school with a PCV as a practice teaching training site at least three months prior to the practice teaching portion of training.

* Identify and invite students at least two months prior to practice teaching to allow plenty of time for communication with students' parents.

* Contact teachers, support staff and PCV's at least two months before the beginning of practice teaching.

* Delegate the responsibility of site administration to the volunteer at the site.

* Continue using both Malawian teachers and PCV's in classroom evaluation.

* Prioritize cross cultural sessions and reduce the number of scheduled sessions.

* Solicit from all PCV's in country a list of potential guest speakers for PSI.

* Ensure that each "trainee" has a motorcycle and appropriate equipment at the beginning of training.

* Schedule motorcycle training during the first weeks of training.

* Duration of motorcycle training should be a minimum of 3 to 4 hours per day for two weeks.

* Maintain a motorcycle training staff of two minimum.

* Rewrite the language teachers' contracts so that they are paid by the day rather than by the hour.

* Responsibilities of each staff member will be based upon a job description written during staff training and approved by the APCD/T or the P&D. This should be attached to individual contracts.

PEACE CORPS TRAINING PHILOSOPHY

Two key components for an Integrated Training System are commitment to a philosophy and accountability — which assumes the existence of goals and standards. This section outlines the present Peace Corps training philosophy, its training goals and the assumptions underlying the two.

Peace Corps Training is:

1. An on-going process started during staging and continued throughout the Volunteer's service, involving Staging, Pre-service, In-service, and Close of Service Training.

2. An integrated process, with no single component conducted in isolation, i.e., technical skills are learned within a cultural context.

3. A model of the development process which promotes self consistency, problem analysis, problem solving and critical thinking.

4. Based on clear behavioral objectives, with minimum performance levels, which are shared with trainees. The selection process includes mechanisms for immediate feedback and evaluations of trainees.

Peace Corp training uses methodologies and techniques that show each trainee as an adult possessing varied individual abilities and skills; it builds on these and involves trainees in the decision making process.
1. Training activities will replicate a typical Malawi PCV experience in terms of processing, problem solving, and self assessment.

2. There will be a shared responsibility for success (staff and trainee), therefore there should be a shared responsibility for the planning and the delivery of the training.

3. The members of the community must be willing to listen to the opinions of others also there should be a sensitivity to the needs of others as well as to their own needs.

4. There must be a high quality and great quantity of communication.

5. All members of the community are educationist (staff and trainee). All members must be continually aware of this.
What Is Experiential Learning?

We all learn from our experiences. By touching a hot stove we learn to avoid heated objects. By dating we learn about male-female relationships. By being in a family, we learn about family life. By giving his youngest sister all his used furniture (and having her sell it at exorbitant prices and keeping the money), the authors learned about being conned. Everyday we have experiences we learn from. In fact, education is often defined as changes in behavior caused by experience. Certainly many things about relating to other people can only be learned by experience. Reading a book about marriage is not the same as directly experiencing marriage! Hearing a lecture about love is not the same as learning about love through experience! Experiential learning is one of the most pervasive aspects of our lives.

The use of experiential procedures to learn about behavior in groups was greatly influenced by the personal style and theories of the famous social psychologist Kurt Lewin. Lewin's colleagues and students have been the chief promoters of experiential learning in the area of group theory and group skills. One of Lewin's tendencies was to discover valuable concepts and principles from observing his own experiences and the experiences of others. The most trivial experience, the most casual comment, might spark a thought in Lewin's mind that would result in a new theoretical breakthrough in the social psychology of groups and interpersonal relations. Those associating with him never knew when an important discovery would be made and this gave their association with Lewin an excitement rare in a relationship with a professor or a teacher. Students and colleagues learned from Lewin how important it is to examine their own experiences for potential principles about the way in which groups develop and work effectively. Thus, Lewin's personal style focused upon experiential learning.

Much of Lewin's research and theorizing focused upon groups and also supported the use of experiential methods for learning about group dynamics. In the late 1930's, and the early 1940's, Lewin conducted a series of studies on group behavior. The findings of his research emphasize the importance of active participation in groups in order to learn new skills, develop new attitudes, and make behavioral patterns more effective. Thus, Lewin's research demonstrates that learning is achieved most productively in groups where people could interact and then reflect upon their mutual experiences. In this way they are able to spark each other's creativity in coming to conclusions relevant to group dynamics and in making commitments to the group to behave in more effective and skillful ways.
Lewin also had a deep commitment to democracy. Through his influence (as well as through the influence of others) democratic procedures pervade the social psychology of groups and underlie the practice of letting students formulate their own learning goals and pursue their own interests in the area of group dynamics. From Lewin, therefore, came the emphasis on studying one's own experiences in order to learn about group dynamics, on discussing mutual experiences with associates in order to increase mutual creativity and learning, and on behaving democratically in structuring learning situations.

How do you tell when you are in an experiential learning situation? When you generate your own experience a set of concepts, rules and principles to guide your behavior and then continually modify these concepts, rules and principles to improve their effectiveness, you are learning experientially.

Experiential learning can be conceived of as four stages:
1. concrete, personal experiences are followed by
2. observation of, reflection upon, and examination of one's experience which lead to
3. the formulation of abstract concepts and generalizations which leads to
4. hypotheses to be tested in future action in future experiences

This learning cycle (Figure 1.2) results in personal theories about effective behavior and is continuously recurring as you test out and confirm or modify your theories and generalizations.

Experiential learning is based upon three assumptions: 1) that you learn best when you are personally involved in the learning experience, 2) that knowledge has to be discovered by yourself if it is to mean anything to you or make differences in your behavior, and that 3) a commitment to learning is highest when you are free to set your own learning goals and actively pursue them within a given framework. Experiential learning is a process of making generalizations and conclusions about your own direct experiences. It emphasizes directly experiencing what you are studying, building your own commitment to learn and your being partly responsible for organizing the conclusions drawn from your experiences. If you want to learn experientially about leadership, for example, you would take part in an exercise focusing upon leadership and then reflect upon it in order to build conclusions about the nature of leadership and how you may engage in effective leadership behavior.
In experiential learning, the responsibility for your learning is upon you -- not the teacher or the coordinator of the exercise. In experiential learning you need to become active and aggressive in your learning role and give emphasis to constructing your conclusions. The experiential situation is arranged so that you can experiment with your behavior, try things out, see what works, build skills, and generalize for yourself out of your own experience. Appropriate theory is then presented to help summarize your learning and to help you build framework of knowledge that organize what you know. While experiential learning is a stimulating and involving activity, it is important to always remember that experience alone is not beneficial; you learn from the combination of experience and the conceptualization of your experiences.

Figure 1.2 Experiential Learning Cycle

1. concrete, personal experiences

4. personal theory to be tested in new situations

2. observation, reflection, examination

3. formulation of abstract concepts, rules, principles
Maslow's Hierarchy of Needs

1. Survival
   - Food and Shelter
2. Safety
   - Psychological and Physical Order and Structure
3. Belonging
   - Affiliation, Social, Sexual, Profession, etc.
4. Competency
   - Achievement, Productivity, Recognition by Peers, Meaningful Work
5. Self Expression
   - Individuality, Creativity, Assertiveness

This pyramid represents a dynamic, not static, model of the needs of an individual. Self expression cannot be achieved unless the lower needs have been fulfilled.
effect what realm an individual may find him/herself.

For example, a person within their country may have attained the level of self-expression, however, when in a foreign country with little language fluency, little knowledge of customs, and unfamiliar with the locale, may plunge to the levels of survival and safety.

As a person's coping skills expand, which allows for acquisition of those things to fill his/her needs, acceleration up the hierarchy increases.

In Peace Corps training, skill development that fosters, promotes such things as information filtering, discerning cross-cultural cues, etc. assists the trainee, as well as the PCV to move up and down and up Maslow's hierarchy with increased proficiency as they encounter new situations.
DALE'S CONE OF EXPERIENCE

APPLICATION OF A BASIC LEARNING PRINCIPLE

An important learning principle is supported by extensive research that persons learn best when they are actively involved in the learning process. Dale's Learning Cone of Experience shown below shows various learning activities grouped by levels of abstraction. The left column indicates their relative effectiveness as training techniques.

**PEOPLE GENERALLY REMEMBER**

A Represents an event, a fact, an activity, some form of reality that exists, something that is.

B Can be seen as someone's interpretation of "A". It represents a stage in information gathering where the factual reality is put through someone's lens or perception screen with which they view the world. ("Rose tinted glasses" if you will.)

C. Is a person's response to either "B" or "A".

"If you ask me about 'A' or you tell me about 'A' I have to get my information through the procedures at stage 'B'".

"But there, at 'B', is what we have to be aware of. One's experiences or perception of reality is going to alter what they pass on as information about such 'reality'. For example, two people go to a movie and interpret its 'reality' differently. Peace Corps Volunteers in the host country experience the 'reality' of the market place, local food and customs differently. What the movie goers and Peace Corps Volunteers are doing is giving you their experience or interpretation of what 'reality' was for the..."

"So when you are stage 'C' -- when you want to respond to the reality or facts surrounding a particular situation -- check it out. Is your 'reality' coming from 'A' or 'B'?"

"Of course, sometimes you may not have a choice. Your only available information for making a decision or forming an opinion may come through the screen of someone else's experience. Then your skills at gathering, validating, integrating and filtering information becomes very critical."
How should I treat the information once its' provided?

--views not here (most of us here have had a positive PC experience, we're not the ones who left early. What about HCN response to PC?

-- "truth" (There's no reason the information you get about Country X should be treated as more "true" than you would treat information in a back home setting.)

-- PC community (should you treat information you receive from volunteers or staff equally? Are some volunteers better sources than others/Why?)

-- ambiguity (Can I live with the ambiguity that seems to exist in response to this question?)

-- own truth (What am I going to do to follow up this information with other questions; with other sources/What do I need to know in order to be satisfied?)

-- perspective (How does the information source's perspective about life, fun, development match my own?)

WHAT WENT WELL?
WHAT DIDN'T:
NEXT TIME?
Teacher training was broken down into two areas: information sessions and practice teaching. It was designed to give the trainees specific information about secondary schools in Malawi and to introduce them to the materials and resources they would be using as teachers. The information in the initial sessions was presented such that it would be applicable and useful during practice teaching and once the trainees were posted to their sites.

This training actually began on July 31 with a field trip to Mitundu Secondary School where the trainees were welcomed and given a tour by a WUSC volunteer teaching at that school. On August 13 and 14 the first information sessions were held and the headmaster and a teacher from Mitundu in addition to several PCV's were present to work individually with the trainees as they were introduced to syllabuses, books, manuals, exams, schemes of work, and lesson plans. A schedule and evaluation of this program are in Appendix E.

On August 27, the teachers' sites were announced and on August 29, the practice teaching schedule was introduced. On August 30 and 31, the responsibilities for practice teaching were delegated. The trainees then began to plan their lessons and generated lists of activities and field trips for that period.

In early September, all of the trainees posted to schools in the Central and Southern regions were given the opportunity to visit their schools and whenever possible meet with their headmaster or his representative. The trainees posted to Mzuzu and Nkhata Bay visited their schools during practice teaching.

On September 13, all of the teachers left Lilongwe and travelled to Mzuzu for practice teaching. This program was the culminating experience in that the trainees were called upon to integrate the information they had previously received and perform in front of a class. On September 25, the trainees filled in their final evaluation of the teacher training and they departed to Lilongwe on September 26.
The main purpose of the practice teaching program in Mzuzu was to give the teachers (trainees) the opportunity to teach Malawian students in a Malawian school situation. We felt that this would help them overcome the initial nervousness in class and help them begin to develop the skills or approach necessary to be effective teachers in Malawi. This program was structured to give the trainees an introduction to a typical Malawian school and an average group of students. It was hoped that this would provide them with a solid base on which they could build while giving them the opportunity to make some mistakes and receive feedback to improve their teaching styles before actually beginning at their schools.

The teachers were given the responsibilities of staff members and the various planning, supervision, and organization duties were delegated to them. Different people were put in charge of different portions of the program and it became their responsibility to see that their activity was well organized. We emphasized working with the students in helping them to plan their own activities rather than giving them ready-made entertainment.

In the initial planning stages it became apparent that for this program to succeed, the students would need to eat well and have diverse activities to keep them busy all day. To accommodate the students who were giving up two weeks of their holiday, we decided on a "summer camp" model with classes in the morning and activities or sports in the afternoon and evening. As during the school year, the challenge lay in keeping the students active all day without working their teachers fourteen hours every day.

This program began on Friday September 14 with a welcome/introduction session, distribution of books and supplies, and demonstration classes in the morning. The afternoon was less formal with small groups of students spending time with individual teachers as they visited the school and told about themselves. This was followed by sports and a dance in the evening. The structured morning and the informal afternoon helped to set the tone for the entire program.
The informal student-teacher interaction continued on Saturday morning (15/9) as the students approached their teachers and offered to show them around town during their free time. The key in making this informal was that the activity was not mandatory and that the students were encouraged to seek out teachers with whom they wanted to spend time. The sports competitions continued in the afternoon.

Sunday was a day off for the teachers and a field trip was scheduled to Nkhata Bay for all except the four who remained behind to supervise student activities in the afternoon.

On Monday (17/9) we began practice teaching and the same schedule was repeated daily for five days. Each teacher had the opportunity to teach fifteen classes (an average of three per day) in their primary subject. Due to the small size of classes (six to nine students per class), a lot of material was covered and the teachers found it a positive experience.

On Saturday and Sunday (22,23/9) we took a field trip to Chikangawa, the headquarters of the Viphya Pulpwood Plantation. The teachers stayed in the resthouses (except for two who stayed with the students) and the students stayed at the local primary school. The visit was good fun with the highlight being our soccer victory over the local team on Saturday afternoon.

Monday and Tuesday (24,25/9) were set aside for video teaching and assessment at Mzuzu Teachers' College. This was a very useful tool for self evaluation by the teachers as it gave them the opportunity to view their mannerisms and hear their speech patterns first hand. Since only one class of students was involved in recording at a time, the others remained at the school or walked to the radio station to record their songs for later broadcast.

Tuesday evening we had a farewell dinner with the students complete with singing, speeches and the giving out of gifts (mathematical instrument boxes and note books) to the students by their teachers.

Wednesday morning (26/9) the teachers departed for Lilongwe via the lakeshore road.
Planning for the practice teaching component was begun in early June when Mzuzu Government Secondary School was designated as the site. An early choice of site is important so that students can be invited early and permission from their parents received before they leave school in late July. Initially, a list of interested students in forms II and III was compiled. This was reviewed by the headmaster, the deputy headmaster and myself and we formulated a list of 55 participants who were invited. This was done before the Republic Holiday in early July so an informational letter with permission slip could be sent home with the students. We received 53 positive responses and 43 of these actually attended the program.

In mid-July, after most of the responses were received, I held a meeting with the interested students to give them more specific information on scheduling and activities during the 14 day program. At that time, I got a list of the students' points of origin and travel itineraries to school after which I told them we would reimburse their transport costs by local bus. It was important to confirm points of origin before announcing about the travel reimbursement because many would take advantage of the offer and travel to Blantyre to visit an Uncle or Sister and expect reimbursement. At this time, I also told the students that they would be eating meat or fish every day and that there would be plenty of food. This was well received because the usual diet at secondary schools is rather insufficient. In addition, I billed the program as "serious in the morning" when they would be in class and "fun in the afternoon" with sports, field trips and club activities. The main goal of this meeting was to give specific information about the upcoming program while setting down the ground rules (wearing of uniforms, promptness, discipline...) and sweetening the pot enough to get the students excited about returning to school two weeks before the end of their holiday.

In mid-August, I received word that J.C. results would be released in late September during our program. Some of the students said they heard of others who were afraid to come to the practice teaching session lest they didn't pass and were humiliated in front of their friends. I quickly sent off a letter to all of the form II participants
saying that they were chosen because of their good results during the term and that I was confident that they would pass. In this letter, I also told them of the activities that we had planned and encouraged them to arrive promptly on September 13. This type of advance communication and planning seemed to work well. Out of the initial 55 who expressed an interest in participating, 43 actually came and judging by the participation in non-mandatory activities at Mzuzu Government Secondary School, this is pretty good.
Administrative Planning

This was done in two stages. The first stage began two months before the commencement of the practice teaching program and the second began about three weeks before the beginning of the program.

Stage I (two months prior to program)

* Contact teachers to help with the evaluation of practice teaching so they could plan their leave time around the program dates.

* Contacted the headmaster to discuss and agree upon which facilities would be available to us during the program (dorms, class rooms, science labs, store rooms...). Arranged to open a telephone account with the school that would be billed to Peace Corps at the conclusion of the program. Received approval to hire Junior Staff (cooks, labourers...) during their holiday time to help with various duties. Received approval to use school equipment, projectors, books and vehicle (if necessary).

* Contacted the head of the Home Economics Dept. to use cutlery, dishes, and kitchen equipment. Compiled a hand over list of the items we would need and locked these in secure cupboards.

* Arranged with the school Bursar to hire three cooks, four security guards, and two kitchen helpers.

* Visited PTC, Mc Connell, MBS, Chipiku, M&M, Butchery in Mzuzu to enquire about opening LPO accounts and introduce myself.

* Contacted the principal of Mzuzu Teachers' College (L.M. Magretta) to arrange to use their video recording facilities for teacher assessment. Also requested the use of their bus for transport for field trips.

* Arranged with local farmers to plant various types of vegetables that we could purchase from them during the program.

* Contacted interested volunteers and secured a commitment from them to help out with the evaluation/observation portions of the program. Also requested some administrative support from them to help organize different parts of the program.

* Arranged to have hasps put on the lockers in the dorms and have them cleaned prior to the program.

* Contacted the Regional Manager for Oilcom to inform him of the upcoming training program and request his assistance with the provision of Diesel and petrol during the program.

Stage II (three weeks prior to the program)

* Arranged with Hall's Car Hire to rent a minibus from them under the condition that they would provide petrol for us in Mzuzu during the entire training period.

* Confirmed previous commitments from teachers and volunteers to help in the evaluation of practice teaching.

* Confirmed with the headmaster and the bursar that our previous agreements were still valid and that the support staff had been hired.
*Confirmed that the video equipment at the Teachers' College would be available and that staff would be on hand to do the recording. Wrote a letter to Mr. P.J. Longwe confirming the times and dates we would be using the facilities.

*Purchased 70 litre of Diesel from Oilcom for use in the Teachers' College Bus for our trip to the Pulpwood Plantation. Stored this in the work shop at the Secondary School.

*Confirmed with the school Bursar that the dorms would be cleaned before our arrival and that the necessary plumbing repairs had been made.

*Purchased firewood for the student kitchen and the dorm boilers.

Three days prior to the beginning of the practice teaching program, I went to Mzuzu to ensure that all of the facilities were ready, purchase supplies, open LPO accounts and work with the teachers and volunteers to make last minute preparations.

In future programs of this nature, I suggest that planning begin roughly in the sequence listed above. This is not an exhaustive list of everything that needs to be done, rather a list of the things that come to mind at this writing. The ten with making contacts as early as two months before the program is that it becomes necessary to follow up many times. This however, is preferable to rushing around at the last minute and perhaps finding that it is too late to make some of the necessary arrangements.
STAFFING

The staff could be broken down into two categories: support staff and training staff.

Support:

- Three cooks from the school were hired to prepare food for the students. The head cook, who was in charge of dividing the work load and making a duty roster, was paid K25 and his two assistants were paid K20 for the training period.

- Mr. Jumbe, the Assistant Head Cook from Bunda College was hired to cook for the teachers and trainers. Assisting him were two women from the school community. Mr. Jumbe received K50 and the two assistants received K25 and K20 respectively for their work.

- Four security guards were hired to be around the dorms where the teachers were staying. The two day guards were also charged with cleaning the dorms and washing clothes while the night guards made fires in the boilers at 3:30am to provide hot water for morning showers. Each of these men was paid K20 for their work.

- The school Bursar, Mr. R.A. Phiri was hired to supervise the students' cooks and the security guards. He also dispersed food to the cooks daily and made sure that most of it was actually served to the students. He compiled daily shopping lists for food and cleaning supplies, and arranged for the delivery of fish, meat, fruit, and vegetables. Before the program began, he helped locate sources of food in Mzuzu and made the necessary arrangements to open accounts with local businesses. His salary was worked out by figuring out his Civil Service salary on a daily basis. This was multiplied by the amount of days that he worked and ten percent was added on top.

- Diane Mescher served as our Site Administrator. She was in charge of supervising Mr. Jumbe and his staff, liaising with Mr. Phiri to coordinate shopping, maintaining LPO accounts with local merchants, planning menus, purchasing, and supervising laundry and cleaning staff.

Training

The training staff was made up of the Training Director, the Technical Co-ordinator, four PCV's and two Malawian teachers.

- Diane Mescher: in addition to her administrative duties, she helped in the evaluation of the Home Economics classes.

- Andrew Danzig: was in charge of distributing and accounting for all supplies and books issued to teachers and students. He also observed French and Math classes.

- Mike Smyser: developed the form used in class evaluation and observed Maths and Latin classes.

The other trainers helped in evaluating Science, Maths and Geography classes.
Observation/Evaluation

This was set up so that each teacher would be observed during one of the three periods they taught each day. When possible, the debriefing session was held immediately after the class to discuss what had happened. Each debriefing session was begun by asking the teacher to critique their performance and this was followed by a discussion of the evaluation form. A guideline form for assessment drafted by PCV Mike Smyser was used.

Initially, the possibility of using teaching ability as a criteria for selection as a volunteer was discussed, but after lengthy consultation, it was decided that the role of the evaluators should be to help the teachers to improve their style. During the first two days of practice teaching, the observers viewed classes in their subject area and after this they switched to observe other subjects. The emphasis in evaluating was to provide the teachers with an opinion of their style and classroom presence or approach to teaching while helping them to improve their communication techniques (clarity of speech or explanation of concepts, board work...).
Entertainment, Sports, Field Trips

We tried to make this as integrated a program as possible by overlapping the different areas. In many ways this was a successful approach. Often the evening entertainment or activities were planned during the afternoon club periods. For example, two groups of students rehearsed many times preparing for the recording sessions at the broadcasting studio, or the students prepared lists of questions in the afternoon that were used for the Top 0! The Class Quiz Bowl in the evening. One group of boys practiced many times to prepare their soccer team for the match against the plantation team. This integrated approach tended to give some substance to the program by having the activities relate to each other. They acted as the objectives that would enable them to achieve their goals.

Entertainment:

U.S.A. TONIGHT: Perhaps the easiest to organize and probably the most successful program of the week, this received very positive responses from the students. I would certainly recommend repeating this in the future and organizing it the same way.

*Hold it early because it helps teachers and students break the ice and establish a rapport.

*Break up the large group into small groups of 6-12 students and 2 teachers. If each group had a separate room it would help to avoid distractions.

*Teachers should have personal photos of family, friends, home..., books on the U.S., picture calendars, post cards.... They can explain these to break the ice and questions from the students follow in an informal manner as a result of their curiosity of the U.S. PCV's must be told in advance so they can arrange to bring these items to the training site.

*Reassure teachers that they can talk about any aspect of the U.S., not just their state.

*Allow at least 2 hours for the session as there will be many questions. The students will not be bored.

*If time permits, this could be repeated with teachers meeting with a different group of students. This would allow the students the opportunity to get a different point of view.

NEW GAMES NIGHT: An easy activity to plan and execute, this was well accepted by the students.

*It allowed the students the opportunity to let off some steam.

*Teacher participation was good and their enthusiasm helped motivate the students to take part in activities that they normally would have dismissed as bizarre.

*The teachers put together a list of "fun", non-competitive games and introduced them to the students. The most successful was perhaps, to everyone's surprise, the "Hokey-Pokey."
TOP OF THE CLASS QUIZ: One teacher was in charge of organizing this activity, and three others helped out in the planning. It went well with excellent participation from the students, but there were some awkward moments (especially when the format deviated from the MBC quiz game).

*There were 6 teams of four students. This worked out nicely because more than 6 would have been difficult to work into a schedule, and less would have made competition more limited.

*Three rounds of competition were held before the championship and each round lasted 15 minutes (a good length).

*Each student was allowed 30 seconds to answer a question. This was much too long and should be reduced to 15 seconds.

*Tables, score board, time clock, tournament rankings were set up in an entertaining manner which helped the entire evening progress in a light atmosphere.

*Students felt that there should be "real" prizes for the winners rather than the mock up certificates that were awarded.

*The Students made up most of the questions themselves by team during the club period in the afternoon. The teachers reviewed and recopied them onto separate sheets. This process was very time consuming.

*The M.C. is very important in keeping the evening live and fun. Preferably s/he should be extroverted.

*This was a very successful program that should be used in future training programs.

AMERICAN MUSIC NIGHT: The idea was that since the students like to dance and listen to music, that they would appreciate hearing and dancing to some American music. This turned out to be a fallacy, and the only music they seemed interested was the American music currently known in Malawi.

*Perhaps this could be done as a club activity with a small group of interested students and no dancing. Listening to music and explaining what the different instruments are, what the lyrics are saying etc.

*This would require more advance planning, and music with a good beat should be chosen as this is what they value most in music.

DRAMA: The idea of this activity was to have the teachers develop a theme and storyline of a play and present it to the students. The students would then break down into three groups to prepare three different plays one in French, one in English, and one in Chichewa.

*The idea was sound, and the students were very interested. The problem came with different ideas on the part of teachers. Some thought that scripts should be written in each language and then adhered to during performances, while others felt that it was better to leave the students to ad lib on the theme and storyline.

*In the end, the students used the ad lib approach and this seemed to help them be more spontaneous and enjoy it more. This turned out to be the best approach because of the limited amount of time. It also helped make this a relaxed, fun evening because no one expected perfection, rather they expected to have a laugh and a good time.
Sports

In addition to the practices for the soccer match against the Viphya team, several other sports were played during the two weeks. Games of Volleyball and Basketball were played, but perhaps the most successful were the American sports of Softball and Ultimate Frisbee. The students participated in these new sports with much interest and intensity because they were different to anything they had ever seen before. Many times they approached the teachers during their free time to borrow frisbees so they could practice.

"The success of the sports program was largely due to the interest and motivation that the teachers brought with them.

"Dividing the students into teams for purpose of tournament competitions was discussed, but it was felt that this would perhaps hinder the learning of the new sports and that the students may only wish to compete in the sports they were already familiar with."
Field trips
Throughout the thirteen day program, three different trips were planned: one to the studios of the Malawi Broadcasting Corp., one to the Mzuzu Airport, and one overnight trip to the Viphya Pulpwood plantation. I made the initial contacts in person and had the teacher in charge of the field trips write a letter to each place to confirm times and the dates of our visits.

To avoid travelling in large groups and crowding into small rooms at MBC and the Airport, we broke the students into two groups according to their year in school. On Monday 17/9 the form II group went to the radio station and the form III group went to the airport. On Friday 21/9 the groups switched and visited the place they hadn't yet seen.

Both places were big hits with the students: MBC because they got to ask all sorts of questions to the D.J.'s they hear on the radio every day, and the airport because they were able to see the weather recording equipment, radar and other apparatus that they've learned about in school.

On Monday and Tuesday 24, 25/9, different groups of students returned to MCC to record some songs that they had worked on during the club and activities periods of the week before.

The proximity of these places to the secondary school made it very easy and cheap to visit them. Different teachers were assigned to escort the various groups as they walked to the radio station and the airport. The trip to the Pulpwood Plantation was very successful in several ways. Firstly, all of the students had studied about it in their Geography classes, so the trip reinforced their classroom experience. Secondly, they were able to visit a place that they never would have had the opportunity to see otherwise because it is out of the way and difficult to get to. Thirdly, the soccer game that we scheduled against the local team gave a group of students a place to focus their energy during the sports sessions of the previous week.

These field trips provided the teachers with the opportunity to supervise students outside of the school setting. They also demonstrated the validity and motivational qualities of experiential learning in a secondary school situation.
In rereading the section on practice teaching, it seems that the emphasis was often placed on the students rather than on the teachers. The training was indeed for the teachers, but as stated in the introduction, without making the students feel that they were having a much better time at school than they would have at home, the program could not have been as successful. In providing an integrated program for the students, the teachers had to organize everything. This gave them teaching experience in the classroom, in planning activities, in supervising students during activities both on and off the school premises, and helped them become familiar with how a secondary school in Malawi functions.

The trainees rated this portion of training a 4.8 out of 5. The success of this program was due to very positive factors: the teachers and their students. The teachers were highly motivated and took initiative when they saw something that had to be done. Their high level of enthusiasm both in the classroom and during the activities motivated the students to join in the program with intensity. The students bought into the program completely and I attribute this to the motivation, interest, and excitement of the teachers. The students saw that if they work with the staff that they can have a very positive experience both in terms of learning and recreation.

The following compiled summary of the evaluations filled in by the teachers explains their feelings about the different aspects of practice teaching. Since training is for the trainees, this will stand as a conclusion.
EVALUATION OF THE TEACHER TRAINING PROGRAM IN MZUZU

The purpose of this practice teaching program was to introduce you to an average Malawian secondary school and a Malawian classroom situation. Keeping this in mind, I would appreciate any comments or suggestions that you may have in evaluation of this program. All comments and suggestions will be compiled and included in the final training report which will be used as a reference for future training programs.

1. Which aspects of teacher training in Mzuzu were most helpful in orienting you to secondary schools and teaching in Malawi?

*All aspects including sleeping and eating conditions in addition to classroom behavior. All myths were vanished regarding the rumor that the students only 'polly parrot' information.
*Teaching our own classes based on an average time schedule.
*Actually seeing a school, meeting students, and seeing laboratories.
*The chance to meet staff members/actually teaching a class/getting a feel for school logistics.
*Teaching Malawians was very helpful and also observing how the school is administrated managed and the social barrier between the staff and students.
*40 minute class periods/holding it in a "real" secondary school and having Malawian students made it pretty realistic or true to life.
*I learned that mixing as an equal is not appropriate for either the teacher or the student. An aspect I found important was communicating to the students that learning could be a good time. Having to be responsible for 40 boys overnight during the field trip was difficult but a good introduction to the duties of a teacher.
*Having enough people who had taught in Malawi. Having actual students.
*The most important aspect was meeting the students, getting a feel for their reactions, having to plan their time, trying to maintain their respect throughout. Also, getting a feel for the time required to plan lessons, activities, etc.

2. Do you feel that this program was representative of an actual school situation in Malawi? Specifically, which areas seemed most realistic and which would you recommend changing?

*From what I have heard, I believe this program was representative except for the absence of girls which makes a different atmosphere. However, is it usual for the students not to know of activities until just before they happen?
*Kind of. Most realistic: schedule, students attitudes, respect, clubs.
Concerns: Class sizes were small and perhaps we progressed too quickly in completing our lesson plans than we will at our schools.
*The actual teaching was helpful but I felt that too much emphasis was placed on entertaining the students and this detracted from the experience.
*Not necessarily representative due to the exceptional calibre of students, but probably the best situation for training.
*Probably as realistic as possible under the circumstances, but obviously a typical class will have more students and move slower.
*Yes, can't think of any changes.

*Yes, the rigidity of the system was apparent. I wouldn't recommend any changes. The students were obviously more light hearted as they realized this had no ramifications on their actual educational notes. This was good and helped ease the pressure. It was good for us to have to run clubs, sports, etc. It gave us a real look at the way things might be.

*The program was as representative as it could be given the situation. The fact that the students were brought back specifically so we could teach--and their knowledge of it--can not be changed. I can't recommend any changes--I think it was really beneficial.

*The program was challenging, though not as hectic (I'm sure) as a normal school year since it is impossible to have all the other teachers and students there to deal with. I will use this past week as a guide line--take it five times and I have an idea of the pressure involved in teaching. The program was very representative of an actual school situation--students' time had to be structured, usual duties were assigned--well done.

3. Are there any areas that you feel you need more training in at this time (should these be addressed in future pre-service trainings)? Which areas would you like to address during in-service training?

*Can't think of any.

*Public speaking needs attention. The teacher volunteers (COS) were worth their weight in gold. So were the faculty members from Mzuzu and Technical Trainers. In future do the video teaching and allow time to return to the class room to work on certain weak areas.

*Protocol in the classroom: who stands when, and why.

*No.

*It's hard to say at this time. Give me a month on site and I'm sure I can come up with suggestions for in-service training.

*The necessity of maintaining a definite separation between students and teachers. More information on the limits of teachers' authority: do's & don'ts especially regarding teachers who are close in age to the students.

*I would prefer that the video taping be done mid-week so that people could work on changing their style.

*I'm curious about why the girls do less well than the boys in school, and it might help to discuss more on discipline. Also, how better to teach for the JC and MCE exams.

4. Did you find the observation/evaluation process to be adequate? What would you do differently?

*The best thing about the evaluation was that I felt it was low pressure. If I had wanted more supervision or evaluation, all I had to do was ask. The evaluators were differing degrees of help, but I felt free to accept or reject their opinions.
*Very adequate. Nothing should be changed because I think that more evaluation leads to a better realization of one's habits.*

*Yes, it was good that all the evaluators were laid back. This gave the trainees the feeling that the whole gig wasn't riding on each lesson.*

*I could have used more feedback, although what I got was excellent. Most of the evaluation and of observations I received came from the students, rather indirectly. What I would recommend is a period of 5-7 days after teacher training so that each teacher will have the chance to assess themselves, and based on that assessment improve their performance.*

*Very beneficial, but I would limit the number of evaluators/class to no more than two.*

*Helpful and more than adequate.*

*I felt it was a sort of hit and miss process and unfortunately my best class was missed. I got hit 7 straight times in the middle of the week and none at the end of the week when I warmed up.*

*I was adequate, however, I feel evaluators would have been more helpful at the end of the week than the beginning. Limit observation to support at the beginning.*

*It would be helpful if the evaluator had some idea of your objectives beforehand so as to ascertain whether you are achieving your goals.*

5. How would you rate the relevance of the initial sessions in Lilongwe (on syllabus, calendar, schemes of work, lesson plans...) to the program in Mzuzu. Please be specific.

*Relevant, though much of that has to be experienced to be real. It helped to have an introduction and to see it for the second time instead of the first.*

*It would be better if immediately after we could practice teach, just so the actuality of lesson plans etc. become real.*

*This perhaps is the weakest aspect of training. The French sessions were very good. I enjoyed seeing Mr. Martin and doing some peer teaching. However, coverage of syllabus, schemes of work, lesson plans was vague at best.*

*Good in that it provided an early start in preparing lesson plans.*

*Good to become familiar with the tools at our disposal, i.e. syllabus, text books, work books, etc.*

*The meeting with Mr. Banda was very helpful.*

*Confusing--cram session. Needed more explanation it was rather over our heads and difficult to conceive at the time.*

*I would rate the initial sessions as being very informative to the program. Putting time in on a calendar, schemes of work, lesson plans etc. prepared us to use this information in Mzuzu.*

5. Would you recommend using video assessment in future trainings? Why or why not?

*Yes, it is useful, though embarrassing to see for yourself what is not good about your teaching style. When it stared me in the face, I couldn't deny it and I'm not as likely to forget those problems.*

*Yes, It helped me realize that what I had been told in the observation/evaluation sessions was actually true.*

*Yes, it wasn't a great experience but it gave an objective perspective--certainly it wasn't harmful.*
*Did not appear to be too beneficial.
*Yes, because it is most helpful as a self evaluation tool. Perhaps future trainees should be made to evaluate themselves fully before discussion with trainer.
*No, as a veteran of video I feel actual live observation is much more helpful.
*Yes, you are your worst and best critic.
*The video assessment gives you the opportunity to see any mannerisms that you would like to avoid and lets you assess your eye contact.

7. Given our constraints in terms of class size and scheduling, do you feel this twelve day program has given you a feeling for what teaching in Malawi is like?
*It is a definite start. I think the program was well planned presented and thought out. It went off with no outstanding problems—even when th coordinator was sick for two days, the program was organized so that it could run itself. I felt as if the trainees played an active part—we were not helpless to change anything we disliked or felt could be made better. It was a hard week, but exhilarating.
*This has been the best period of training.
*Yes, superb success. Teacher training here would be a sham without it. There are still questions I have, but I have enough confidence to answer them on my own.
*Yes, probably the most beneficial aspect of pre service training. It was well planned, organized and carried out.
*If it does not give a feel for teaching for everyone, then at least it alleviates the problem of adjusting to a new situation. The volunteer can hit the ground running at their school. It might be more helpful (if logistically possible) for trainees to spend more time—a couple of days—at their own school to become familiar with the physical plant and staff.
*I certainly do with boys. Girls will probably be different.
APPENDIX E
GOALS FOR TEACHER TRAINING WORKSHOP
AUGUST 13, 14

1. To introduce trainees to how their subject is taught in Malawi.

2. To provide resource persons who have taught each subject to introduce schemes of work, texts, teachers' manuals, past exam papers, and to answer questions.

3. To provide information to the trainees that will be useful in planning their time at school (school calendar, actual teaching time, unscheduled holidays...)

4. To familiarize trainees with the actual text and work books they will be teaching from.

5. To analyze past exam papers using the Examination Analysis Process.

6. To write a specific scheme of work utilizing the syllabus, teachers' manuals, textbooks, and exam grids.

OBJECTIVES

At the end of this workshop, the trainee will:

1. Have read the most important textbooks used in his/her subject area.

2. Have analyzed several past exam papers by topic to determine which topics are emphasized on the examinations.

3. Have written a detailed Scheme of Work for one term broken down into weekly units specifying references used, page numbers and exercises or experiments planned.
TEACHER TRAINING WORKSHOP – AUGUST 13, 14, 1984

Monday, August 13

9:30 - 10:30 Welcome, Introduction/Expectations
   -Headmaster's expectations of staff members
   (G.J.M Banda - Headmaster: Mitundu Secondary
   School)
   -General school information: Calendar

10:30 - 11:00 Tea Break

11:00 - 12:00 Session I: Read syllabus and look at past exam
   papers
   -develop a list of topics on the syllabus

12:00 - 12:40 Session II: Introduce textbooks, workbooks,
   teachers' manuals
   -locate different topics from the syllabus in
   the books and manuals

12:40 - 2:00 Lunch

2:00 - 2:30 Session III: Introduce Schemes of work for
   specific subjects
   -evaluate according to syllabus

2:30 - 3:30 Session IV: Introduction of Examination
   Analysis Process
   -begin evaluating past exam papers

3:30 - 4:00 Tea Break

4:00 - 5:30 Continue with evaluation

5:30 - 6:00 Free Time

6:00 Dinner

Tuesday, August 14

7:50 - 8:50 Language Classes

8:50 - 9:30 Breakfast

9:30 - 10:30 Continue with Examination Analysis Process

11:00 - 12:40 Session V: Write a detailed Scheme of work
   utilizing information gathered from sessions
   I-IV on syllabus, books, and the Examination
   Analysis Process
12:40 - 2:00  Lunch
2:00 - 3:30  Continue scheming
3:30 - 4:00  Tea Break
4:00 - 5:00  Finish schemes
5:00 - 5:30  Closure: Evaluation of workshop
             -generate a list of topics for further training
SESSION NAME: WELCOME/INTRODUCTION

TRAINER: Devlin

NO OF TRAINEES: 12

DATE: 13/8/94

OBJECTIVES: To introduce the two day workshop and have a Malawian headmaster give his expectations of teachers as well as his impressions of volunteers. To introduce the School Calendar.

- Copies of past JC and MCE papers

RECOMMENDATIONS  
WHAT WENT WELL?  
WHAT DIDN'T?  
NEXT TIME?  
This session went well, however it could be more useful at an in serv training after they have taught for several months.
Levels of Thinking
Intellectual Abilities and Skills
(Bloom's Taxonomy)

Knowledge

1. Memory  Ability to recall facts/information. (In 1492, Columbus sailed the Ocean Blue.)

Comprehension

2. Translation  Ability to put communication into another form. (State the problem in your own words, interpret a diagram, grasp the meaning of a political cartoon.)

3. Interpretation/Extrapolation  Ability to reorder ideas, comprehend inter-relationships, draw conclusions from different sets of facts. (Give your interpretation of a poem, gather data from a variety of sources and prepare an organized report.)

4. Application  Ability to apply principles to actual situations. (Take principles learned in math and use these to lay out a baseball diamond.)

5. Analysis  Ability to distinguish and comprehend inter-relationships, and make critical analysis. (Discuss how democracy and communism differ, be able to detect logical fallacies in an argument.)

6. Synthesis  Ability to rearrange component ideas into a new whole. (Write a comprehensive term paper, plan a program.)

7. Evaluation  Ability to make judgments based upon internal evidence or external criteria. (Evaluate a work of art, discuss a development project that will damage the environment.)

A good examination should test every level of thinking. The higher the level of thinking needed to answer the question, the more difficult the question seems to the examinee. At the same time, more marks should be awarded for questions at higher levels and so students unprepared to answer such questions will be doubly penalized. Certain topics often are examined at certain levels of thinking because it seems "normal" or "natural" to do
so. If such a trend occurs, the topic should be taught at the level that it is tested. Certain topics are strictly memory and valuable time may be wasted pursuing these topics at higher levels while at the same time some other topics must be taught at higher levels. Making an exam "table" based upon Bloom's Taxonomy is a quantitative and qualitative way to review past exams. It will also allow you to compare your teacher-set exams to the National Exams in a substantive way, the closer your exam is to the National Exam, the more likely your students will be able to maximize their scores on that exam.

The process begins by reading each question. Evaluate the question to determine what topic/topics are involved and at what level of thinking. Then tic the Exam Grid Chart at the appropriate place. When you have gone through all of the questions on the Exam paper, the Exam Grid Chart is completed for that exam.

SESSION NAME: Lesson Presentation

TRAINERS: Blough

NO OF TRAINEES: 6

DATE: 13/8/84

OBJECTIVES: To present a lesson in French using a flannel graph and figurines to demonstrate how the teaching aids can be used to enhance presentation.

<table>
<thead>
<tr>
<th>ACTIVITY</th>
<th>DESCRIPTION</th>
<th>TIMING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Presentation</td>
<td>Lynn Blough used the audio-lingual method to present lesson 6 of Pierre et Seydou 1-A. The purpose was to show how effective a presentation completely in French could be with the use of visual aids, mimick, and acting.</td>
<td></td>
</tr>
</tbody>
</table>

LOCATION: Room 1 Bunda

MATERIALS NEEDED: Pierre et Seydou 1-A 7 copies, flannel graph, figurines.

RECOMMENDATIONS

WHAT WENT WELL?: A good way to introduce the audio-oral method. The surprise factor since the trainees had never seen this type of teaching before was quite effective and helped motivate them to participate actively in future sessions.

WHAT DIDN'T?:

NEXT TIME?:
**SESSION NAME**  FRENCH INSPECTOR'S WK SHOP

**TRAINERS**  J.F. MARTIN

**NO OF TRAINEES**

**DATE**  14/8/84

**OBJECTIVES:**
TO PROVIDE A COMPREHENSIVE OVERVIEW OF THE METHOD USED TO TEACH FRENCH IN MALAWI

<table>
<thead>
<tr>
<th>ACTIVITY</th>
<th>DESCRIPTION</th>
<th>TIMING</th>
</tr>
</thead>
<tbody>
<tr>
<td>MR. MARTIN PROVIDED A COMPREHENSIVE OVERVIEW OF THE PIERRE ET SEYDOU METHOD AND EXPLAINED THE COMPONENT PARTS OF A LESSON INCLUDING PRESENTATION, REEMPLOI, FIXATION, APPROPRIATION. HE ANSWERED MANY QUESTIONS AND SPOKE FROM HIS EXPERIENCE AS A FRENCH TEACHER IN KENYA. TASK: THE TRAINEES OBSERVED MR. MARTIN'S STYLE AND SUBSEQUENTLY PREPARED AND PRESENTED LESSONS IN A PEER TEACHING SITUATION FOR THE INSPECTOR TO CRITIQUE.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**LOCATION:**
ROOM 1 BUNDA

**MATERIALS NEEDED:**
- TEXT BOOKS
- FILM STRIP PROJECTOR
- TAPE RECORDER
- FILMS
- TAPES
- FLANNEL GRAPH

WHAT DIDN'T
NEXT TIME?
A VERY WORTHWHILE WORKSHOP IF!
LITTLE TOO INTENSE. SEE EVALUATION
Ev/uation Tabulation for Teachers' Workshop
August 13, 14

Ten participants out twelve returned the evaluation forms. An average of the numerical scale was provided for purposes of comparison while the distribution was indicated to show the validity of the averages. Comments listed have been copied exactly as they were written by the participants.

1. Headmaster's Expectations of Staff and Ministry Regulations

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>(3)</td>
<td>(2)</td>
<td>(6)</td>
<td>Avg. 4.3</td>
<td></td>
</tr>
</tbody>
</table>

Comments:
1. It was good to know first hand from a headmaster what the deal is.
2. As a representative from the Headmasters organization his presentation covered all areas.

2. General School Information - General Calendar

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>(3)</td>
<td>(8)</td>
<td>Avg. 4.7</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Comments:
1. Nice to know actually how much teaching time there is.
2. Particularly Bob's comments on real US imaginary time.
3. Very useful - though vague (because it's impossible to be specific about a fickle schedule) it helps to have some idea of the general schedule - No. of days of actual teaching time.
4. Helpful to gage your progress.

3. Introduction of Syllabus/Exams/Books/Schemes of Work

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>(2)</td>
<td>(4)</td>
<td>(4)</td>
<td>Avg. 4.2</td>
<td></td>
</tr>
</tbody>
</table>

Comments:
1. It was good to know the importance of the exams and something about schemes of work.
2. Especially important to review the texts and exams.
4. Interaction with Subject Teachers.

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(1)</td>
<td>(2)</td>
<td>(7)</td>
<td></td>
<td>Avg. 4.6</td>
</tr>
</tbody>
</table>

- Should this be included in future programs? Yes (10)

Was your subject teacher effective in answering your questions? (give their names)

Comments:

1. Yes. Bob - very helpful and M. Martin also very helpful.
2. Yes. Bob, Lynn, M. Martin
3. Yes. A bit excessive for the French teachers but good practical experience nonetheless. Bob was great and speaks excellent French - easy to talk to; not condescending.
5. Yes, very. Bob/Lynn.
6. Was not informed of the lack of interaction from the beginning.
   Lynn answered questions that I could formulate to ask. However with a workshop more questions might have been generated on various subjects.
7. Yes. Mrs. Sam.
8. Yes.
9. Yes. Mr. Bando.
10. Yes. Bob and Lynn

5. Introduction of Schemes of Work Format

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(1)</td>
<td>(5)</td>
<td>(2)</td>
<td>(2)</td>
<td>Avg. 3.5</td>
</tr>
</tbody>
</table>

Comments:

1. Introduction was fine but I would have liked to work on actually writing one.
2. Good, but should schedule when French teachers can participate.
3. Useful.
4. Haven't done much with it yet, but it will be useful as its required at school site.
5. Would be nice to know exactly subjects to be taught.
6. Did not review during two days.
6. Examination Analysis Process (Exam Grid)

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>Avg. 3.3</th>
</tr>
</thead>
<tbody>
<tr>
<td>(3)</td>
<td>(1)</td>
<td>(4)</td>
<td>(1)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Comments:
1. Not very helpful for French.
2. As most PCVs have never faced even a remotely similar situation, there may be a need to explain the education/testing situation more fully in advance so that teachers really pay attention to this segment.
3. French teachers didn't do this but the idea seems good in aiding students to pass exams.
4. (Not yet done).
5. Good idea!

7. ICE Session

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>Avg. 3.5</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1)</td>
<td>(1)</td>
<td>(2)</td>
<td>(4)</td>
<td>(2)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Comments:
1. Longer than necessary - just giving the handouts would have satisfied.
2. Have not read yet.
3. I haven't read the handout yet, but it's useful to be exposed to/aware of the possibilities.
4. Short but sweet.

What topics would you like to be included in future teacher training sessions? (Specify your subject if appropriate).

1a. More practice (guess that's at Mzuzu)
b. More demonstrations by a variety of teachers in some sub. area.
c. More ideas on keeping class alive - including using readily available teaching aids.
d. Perhaps some educ. theory precise and pertinent.
4.

ICPE Session (Contd.)

What topics would you like to be included in future teacher training sessions. (Specify your subject if appropriate)

2. French.
   Teacher/Student Relationships.
   Possible Secondary Projects within school framework.

3. In Home Economics I would like to see more interacting with the H.E. counterpart as learning how to care for Home and Family is at least as important as French or Math. More Malawians will care for homes than go on to the University.

4. I would like to have more math books (especially geometry)

5. Let you know in about two months.

6. Meeting of counterpart.

French Teachers only

- What did you like most about the sessions?

1. Practice teaching.

2. Explanation of method - and M. Martin's ideas on involving students thru day to day happenings.

3. Attempting to teach and having the French inspection help out.

4. M. Martins critiques of our presentation.

5. The practical experience - a chance to "get my feet wet".

6. It was very helpful to talk to M. Martin and to review the Pierre et Seydou method.

- What did you like least?

1. I thought all the French time was well spent. However, it seemed that a lot of time was spent doing nothing - particularly when we do not have a lot of background collectively teaching - e.g. on Tues, session was to start at 2.00 p.m....by 4.15 we had had a good presentation by Angela (for 15 - 20 minutes) and heard Charles say nothing

2. The length.

3. A little too intense.

4. The length of sessions, the concentration of information.
5.

- What did you like least? (Contd.)

5. Too hurried. We tried to do too much in too little time. Otherwise, quite helpful.

- Was the practical work on the "tableau de feutre" useful?

1. Yes, but we could use much more time.
2. Yes.
3. Yes, a bit long and somewhat tedious
4. Very.
5. Yes - it gives a good idea of one way, at least to present a lesson. Also, through it, I learned aspects of other methods.
6. Yes, very helpful.

- What areas of the Pierre et Seydou method do you want more information on?

1. Re-emploi - how to plan them - how to design assignments
2. All. Good start!
3. More practice
4a. How to introduce verb tenses and what tenses should be covered in the 1st, 2nd - 4th Forms.
4b. More practice with le tableau de feutre, the films, blockboard, etc..

I feel as though I need to develop my own personal teaching style. As soon as I have spent more time on the texts and tried the difficult methods, then I would like to review these with an experienced teacher, (either Bob or a french professor from Mzuzu).
DAILY SCHEDULE SEPT. 17-21

II denotes that the class has just finished form II.
III denotes that the class has just finished form III.

For the French teachers, IIA, IIIB, and IIIIC have never had French before so they will be starting on lesson 1 of the first book. IIIB and IIIIC will be on lesson 17 of the second book, and IIIIA will be on lesson 6 of the third book.

For Math, Science, Home Economics, and Latin/Geography, you could choose several topics from the syllabus for that level and prepare classes around them.

Taking into consideration that each trainee will be teaching fifteen class periods, schemes should be planned accordingly.

Ref.No. 8/12/col.IV/94. 17th September, 1984

FROM: THE PLANTATIONS MANAGER, Viphya PLANTATIONS DIVISION, P.O. Chikangwa, MZIMBA.

TO: THE HEADMASTER, CHIKANGWA F.P. SCHOOL.
    THE HEADMASTER, NTUNGA F.P. SCHOOL.
    ALL FOREST STATION OFFICERS, Viphya.
    ALL SECTION HEADS, VPHYA.
    MISS SMITH, NURSE IN-CHARGE, Viphya.
    THE SAWMILL MANAGER, MAZAMBA SAWMILL.

VPHYA PLANTATIONS DIVISION

PROPOSED PROGRAMME FOR VISIT OF PEACE CORPS AND
MZUZU SECONDARY SCHOOL STUDENTS

SEPTEMBER 22ND - 23RD, 1984

SATURDAY, SEPTEMBER 22ND:

10.00 Hours approx.

Arrive Chikangwa.
Met by Mr. I. Chunda and
Mr. Nyoni, Headmaster, Chikangwa
F.P. School. Students to be
shown School for sleeping
arrangement etc.
Mr. Chipeta (Buildings) to
arrange Cooking facilities.
Peace Corps to proceed to
Viphya Rest Houses.

10.45 Hours

Mr. I. Chunda, Chief Farm Manager
to arrange visits to:

(a) Cattle Stall Feeding
(b) Poultry Unit
(c) Dairy/Butchery area
(d) Piggery

Followed by visits to:

(e) Chikangawa Workshops/
    Mechanical Stores - Mr. Pumba
    Chief Mechanical Supervisor and
    Mr. Kuyera - Senior Clerical
    Officer Stores to be available.

(f) Chikangawa Main Stores -
    Food and General Items.

Mr. Mzembe - Accountant
Mr. Malungo - Stores Officer
to be available.
12.30 Hours  
Lunch Break.

13.30 Hours  
Mr. A. Hill - Forest Research Officer Viphya to arrange to give short address on Forestry Research Viphya followed by visits to:

(a) Seed Extraction Unit
(b) Research Nursery Champhoyo
(c) Resin Tapping Area Chikangawa.

15.30 Hours  
17.30 Hours  
Football Matches - 2 Teams to be played at the Chikangawa and School Football Grounds.

Peace Corps - Ladies may visit the Chikangawa Maternity/Under Five Clinic if they are interested.

SUNDAY, SEPTEMBER 23RD:

Approx. 09.00 Hours  
Assemble Chikangwa Viphya Headquarters. Talk by Plantations Manager - Mr. D.W. Cornelius over Relief Model on the History of the Viphya Plantation Area up to present time.

10.00 Hours  
Depart Chikangwa for Nthungwa Forestry Station.

Visit en-route:

(a) Plantations of pine 30 years old thinned for Plywood Log Production.

(b) Areas burnt by Fire at Nthungwa.

(c) Tree planted by H.E. Kamuzu Banda - Chauteka.

(d) Dam at Chauteka - Water level dropping rapidly dur. Ig dry season.

(e) Phamphala Fire Look Out Point (6408 feet a s l ) Highest point on Viphya.

(f) Lumono Hills Farm Area. Lunch to be taken at Farm Dam.
### Approx. 13.30 Hours

Visit Nthungwa Station.
Meet by Mr. Chimzukira, Senior Forester and Mr. Mzumara Forester.

### 14.30 Hours

Visit to Chamatete Eucalyptus Area and Ox Training Unit - Mr. Mphande Technical Assistant Ox Training may be available.

Drive via Sinila Dam Area to Mzambe - Visit to Sawmill Area.

Drives by D176 through Plantation to Lusungazi stopping at points of interest en-route.

Depart for Mzuzu to arrive by 18.00 Hours.

All times are approximate and certain visits may need to be cancelled if time does not permit.

---

D.W. Cornelius  
PLANTATIONS MANAGER (VITHYA)
TO: ____________________________

____________________________________

Your son/ward ______________________ has been chosen by the staff members at this school to attend classes for a two week period in late August and early September. During this time the participating students will be taught by new Peace Corps Volunteers as part of their practice teaching before they are posted to different schools throughout Malawi.

Each student who participates will receive individual attention from the teachers as they review topics from the form II and form III syllabuses in Math, French, Physical Science, and other subjects. In addition, the students will be given exercise books and pens that they may keep. Transportation fees will be reimbursed and room and board will be provided at the school.

During this program, school rules will be in force and students will be under the supervision of teachers as during the school term.

The exact dates have not been fixed yet, but we will inform you of these by the middle of July along with particular information on what the students should bring with them. If you are interested in having your son/ward participate in this program, please fill in the bottom of this form, sign it, and return it to us as soon as possible (by July 13).

---------------------------------------

I would like my son/ward ______________________ to attend the two week program at Mzuzu Government Secondary School during the August September holiday. I understand that transport expenses will be reimbursed and that room and board will be provided at the school.

________________________________

________________________________

Dear Sir/Madam,

Thank you for giving your son/ward permission to attend the holiday program at this school. We have begun planning and most of the students who were invited to participate seem very keen.

The program will begin on Thursday, September 13 and finish on Wednesday, September 26. Since the program is only two weeks long and the schedule is very full, it is important that all students arrive promptly on September 13.

As we informed you in the first letter, the U.S. Peace Corps will pay for all of the students' expenses during these two weeks. When the students arrive, they should give us their bus tickets and they will be given the amount of money they spent on transport. In addition, the students will be given soap and all meals will be provided.

For those boys beginning Form IV, they may remain at school from September 26 until the beginning of the school term on October 1. Those entering Form III will be given enough money to travel home on September 26.

During this program, students will be required to wear their school uniforms and to abide by school rules at all times. They will, of course, be supervised as during the regular school terms.

We have planned a very active two weeks for the students and hope they will enjoy themselves while preparing for the next school year.

Thank you for your interest in this program and we are looking forward to seeing your son/ward on September 13.

Sincerely,

Robert C. Devlin
Program Coordinator
### Session Name: Presentation of Practice

**Trainers:** Devlin  
**No of Trainees:** 12  
**Date:** 29/8/84

**Objectives:** To introduce the teaching schedule and delegate responsibilities to trainees for organizing and supervising different activities during the program.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Description</th>
<th>Timing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Presentation</td>
<td>Discussed the teaching schedule and the need for building a staff to plan the extracurricular activities.</td>
<td></td>
</tr>
<tr>
<td>Delegated Responsibilities</td>
<td>For clubs, sports, field trips, student supervision, and compiled a duty roster.</td>
<td></td>
</tr>
</tbody>
</table>

**Location:** Room 2 Bundu

**Materials Needed:** Chalk, News Print, Markers

**Recommendations**
- **What Went Well:** A very motivating session for the trainees.
- **What Didn't:**
- **Next Time:**
OBJECTIVES: To explain the concept of lesson plans as a structured approach to organizing class time.

ACTIVITY | DESCRIPTION |
--- | --- |
PRESENTATION | Introduction of the goal/objective and activity portions of a lesson plan. Disussed the parts of a lesson plan - hand out of activity sheet used by training staff. Stressed the importance of the different components of a lesson plan. Discussed the two general approaches to teaching: activity for activity sake, activity for the sake of the objective.

LOCATION: Room 2 BUNDA

MATERIALS NEEDED: Chalk, newsprint, markers, handouts

RECOMMENDATIONS: A good session that should be continued in future teacher training.

WHAT WENT WELL?

WHAT DIDN'T?

NEXT TIME??

DATE 3/8/84
SESSION NAME: HOW TO USE RE-EMPLOY EXERCISES
TRAINERS: LANZ
NO OF TRAINEES: 6
DATE: 30/8/84

OBJECTIVES: TO INTERPRET THE TEACHERS' MANUALS AND DEVISE A DRILL SESSION FOR USE DURING A CLASS PERIOD

<table>
<thead>
<tr>
<th>ACTIVITY</th>
<th>DESCRIPTION</th>
<th>TIMING</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>INTRODUCE THE CONCEPT OF DRILL IN LANGUAGE LEARNING</td>
<td></td>
</tr>
<tr>
<td></td>
<td>TO EXPLAIN HOW TO MAKE USE OF THE EXERCISES FROM THE TEACHERS' MANUALS AND HOW TO IMPLEMENT THEM INTO A WORKING DRILL IN CLASS.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>DEMONSTRATED HOW TO MAKE USE OF CLASSROOM SITUATIONS IN THE EXPLANATION OF NEWLY LEARNED EXPRESSIONS.</td>
<td></td>
</tr>
</tbody>
</table>

LOCATION: ROOM 1 BUNDA

MATERIALS NEEDED: FLANNEL GRAPH, FIGURINES, TEACHERS' MANUALS

RECOMMENDATIONS
WHAT WENT WELL? A GOOD SESSION THAT WAS WELL RECEIVED BY THE TRAINEES. IT COULD HAVE BEEN MORE EFFECTIVE IF THE TRAINEES HAD MORE OPPORTUNITY TO PRACTICE.
WHAT DIDN'T? NEXT TIME?
OBJECTIVES: TO INTRODUCE THE DIFFERENT SECTIONS OF THE TEACHER'S MANUALS CONTAINING THE FIXATION EXERCISES AND TEXTS AND DEMONSTRATE HOW THEY CAN BE USED TO ENHANCE FRENCH CLASSES.

<table>
<thead>
<tr>
<th>ACTIVITY</th>
<th>DESCRIPTION</th>
<th>TIMING</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>INTRODUCE FIXATION EXERCISES AS A LOGICAL FINAL DRILL FOLLOWING THE REEMPLOI EXERCISES.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>EXPLAIN HOW THESE EXERCISES CAN BE TAKEN FROM THE TEACHERS' MANUALS AND USED IN CLASS</td>
<td></td>
</tr>
<tr>
<td></td>
<td>EXPLAIN HOW THE TEXTS IN THE FRENCH BOOKS CAN BE UTILIZED TO BRING THE LEARNING OF FRENCH OUT OF THE CLASSROOM AND INTO EVERY DAY INTERACTION.</td>
<td></td>
</tr>
</tbody>
</table>

LOCATION: ROOM 1 BUNDA

MATERIALS NEEDED: FRENCH TEACHERS' MANUALS TEXT BOOKS

RECOMMENDATIONS

WHAT WENT WELL?: GOOD, WE NEEDED ONE MORE SESSION AT THIS TIME TO RESTATE THE POINTS
WHAT DIDN'T:
NEXT TIME?: WE HAD GONE OVER DURING THE PREVIOUS SESSIONS
Technical Training for
TECHNICAL SPECIALIST
CONTERPART/TRAINEE "WORKSHOP & CULMINATING EXPERIENCE  
TECHNICAL TRAINING FOR NON-TFACHERS

A high priority was placed on the technical component for non-teacher volunteer trainees (V/Ts) to see to the success of the counterapart/trainee workshop (13th - 14th August) because staff saw this as an opportunity for V/Ts to plan a productive technical training session themselves under the guidance of their would-be co-workers and the training staff. Also, this would be an opportunity for trainees to ask specific job-related questions to people who most likely would be able to answer them, and for V/Ts and supervisor/counterparts (S/Cs) to begin building a working relationship by sharing expectations and setting realistic goals concerning what peace corps volunteers (PCVs) can accomplish on site.

During the workshop, V/Ts and their S/Cs planned the V/Ts' technical training (culminating experience) which took place from around the 14th through the 26th of September. (The FSI language tests were given on the 13th and the V/Ts were free to leave anytime after this but had to leave by the 17th.) Although a schedule was set up for the trainee/counterpart workshop, the people involved were told that they could design their own schedules as long as certain things were accomplished. (These are included in the workshop section of this report.) This worked well especially because some S/Cs came only for one day and had someone else from their department fill in for them on the second day. Lists of contacts for the V/Ts were generated and we suggested that they get in contact with those whom they wished. We made the "training" telephone available for such purposes.

There were problems with a couple of the ministries concerning jobs, sites, housing etc. Some ministries claimed that they were unaware that a PCV was even coming! It was good to find these things out at this time so that these problems could be ironed out. During PST '82, most of the non-teacher V/Ts had not been to their sites, met their co-workers, and supervisor/counterparts at the sites were not even aware that PCVs would
be joining their staff. They had had no introduction to Peace Corps and did not know why a volunteer had been assigned to their area (were they not doing their jobs? etc.). It took some volunteers many months to establish contacts and get a fee for what was expected of them and what they could do job-wise. We hope that the set up for technical training staff used this time for PST'84 will alleviate some of these problems for both S/Cs and new PCVs. Having provided an opportunity for working relationships between V/Ts and S/Cs to be established from the beginning during training should facilitate working relations on site.
TECHNICAL COMPONENT OF PST84 FOR NON-TEACHERS

I. CONTACTS

Between the 18th of July and the first of August, letters were sent out to prospective participants of the volunteer/trainee (V/T) - supervisor/counterpart (S/C) workshop which was held on the 13th and 14th of August. Prior to sending these letters, I met with APCD Charles Blake who gave me as much information as he had about the V/Ts' prospective sites and jobs. The letters to the S/Cs can all be found in the correspondence file (attached are two sample letters) and for the most part contained a brief introduction about PC PST84 and reasons for our requesting participation (representatives) from the ministries involved. We want to fit skilled people from the USA into existing positions within the Malawian system for the mutual benefit of both. The following people actually participated in the workshop and are thus familiar with Peace Corps:

Mr. Alasdair Mccleod
Principal Accountant, PVHO
P/B 32, BLANTYRE
(633-976 office)
(636-336 home)

Mr. Ndovi
Deputy Chief Forester
Headquarters, Box30048
Capital City, LILONGWE 3
'732-322 office)

Mr. Rodney Nkaonja
Assistant Chief Forestry Officer
Division of Management Services

Mr. Goodson Sakonja
Assistant Chief Forestry Officer
Division of Forestry
Headquarters, Box 30048
Capital City, LILONGWE 3
(732-322 office)

Mr. Henry Kadzamila
Construction Superintendent
c/o Secretary of the Ministry of
Works and Supplies
Ministry Headquarters, Capital Hill
P/B 316, Capital City, LILONGWE 3

Dr. Ken Mazengera
Deputy Chief Veterinary Officer for
Disease Control
Veterinary Headquarters, Box 30372
Capital City, LILONGWE

Dr. Thyangathyanga
Veterinary Headquarters

Mr. Ernie Yancy sent PCV Mescher from DEMATT (635-466/636-510)

Mr. Mbekeani sent PCV Easter from MaCoHa (650-466)
Most of the S/C participants were enthusiastic, informative and accommodating. I see this workshop as a step towards better relations and more open communication between PC and the ministries. I would however suggest that contact with the S/Cs be made earlier on, definitely well before the trainees arrive in country, perhaps three weeks or so before the beginning of training.

One of the V/Ts arrived late into training and his supervisor, Mr. Nkoko (Fisheries Department, Lilongwe, 721-766) did not attend the workshop but seems to be excited about a PCV joining his staff.
Dear ____________________

As you may now be aware, a new group of prospective Peace Corps Volunteers has recently arrived in Malawi and is presently participating in a two-month training program at Bunda College designed to orient these volunteers to life in Malawi. The training program includes intensive language and cross-cultural components as well as technical sessions.

The Peace Corps Training Staff is organizing a supervisor/counterpart - volunteer workshop beginning at 9 am on the 13th through the 14th of August at Bunda College for the prospective volunteers and their counterparts. Our goal for this workshop is to take job skills already possessed by the trainees from study and previous work experience in the U.S.A. and adapt these skills to realities of life in Malawi. We hope that this opportunity for volunteers and their counterparts/supervisors to discuss their expectations of the volunteers' jobs as well as exchange pertinent information will be conducive to more productive working relations at the volunteers' job sites. Your participation will greatly enhance the program designs for technical training which will be put together by each trainee under the guidance of counterparts/supervisors and Peace Corps staff. The actual technical training portion of our training program will take place from around the 17th - 25th of September.

Your participation would be greatly appreciated. Please let me know if you plan to attend or who you plan to send in your place so that we can make the necessary arrangements. Accommodations will be provided at Bunda College from Sunday evening (12th) through Tuesday (14th) and petrol expenses for mileage to and from the workshop are reimbursable. We will provide transportation if necessary.

Thank you very much for your cooperation. I look forward to hearing from you in the near future. Please feel free to contact me if you have any questions, comments or suggestions.

Yours faithfully,

Debbe Davis
Deputy Training Director
SAMPLE LETTER FOR S/Cs TO ATTEND WORKSHOP

Dear __________,_

The Peace Corps training staff for Pre-service training (PST 84) is organizing a supervisor/counterpart - trainee workshop beginning 8:00 a.m. on the 13th through the 14th of August at Bunda College for the new Peace Corps (PC) trainees and the people they will be working with. We hope that this opportunity to discuss the specifics of what is expected to occur during technical orientation will be conducive to more productive working relation on site between volunteers and supervisors/counterparts. Your participation will greatly enhance the program designs for technical training which will be put together by each trainee with guidance from working partners/supervisors and PC staff. The actual technical training portion of PST '83 will take place from around the 17th to 29th of September.

Our goal for this workshop is to take job skills already possessed by the trainees from study and previous job experience in the USA and adapt these skills to realities of life in Malawi. Your participation would be greatly appreciated. Please let us know if you plan to attend or who you plan to send in your place so that we can make the necessary arrangements. From Lilongwe petrol expenses for mileage to and from the workshop are reimbursable.

Thank you very much for your cooperation. I look forward to hearing from you in the near future.

Sincerely yours,

Debbe Davis
Deputy Training Director
II. COUNTERPART - TRAINEE WORKSHOP

The Counterpart - Trainee workshop was held on August 13th and 14th at the training site. Accommodations were provided for the S/Cs in the hostels but many chose to commute to and from Lilongwe because they lived so close and wanted to be with their families in the evenings. We offered to reimburse commuting participants 25$t/mile but none of the HCN participants took us up on this. We did provide transport for Mr. Macleod representing PVHO, Blantyre; we paid for his flights to and from Blantyre. Also, we paid for petrol costs and bus tickets for the PCVs representing DEMATT and MaCoHa. Lecture rooms, usually used for language classes, were made available for workshop participants but after the initial introduction of the workshop and participants most people broke up into small groups by sector and could be found out on the grass or in the Senior Commons room or wherever.

Enclosed are the handouts which the participants of this workshop received at the welcome introductory session on Monday morning, the 13th of August. We passed out welcome packets to S/Cs and V/Ts which included handouts: Overview of goals and objectives of the workshop; a tentative schedule; a list by sector of the participants as well as pads and pens. (Note: Most sectors brought more than the anticipated number of participants so extra welcome packets needed to be provided.) We discussed the workshop goals and objectives and self introductions of all participants were made to the group as a whole. Questions and answers and logistics were also taken care of at this time.

The TD, Technical coordinator and I had previously put together a tentative schedule for the workshop but it was explained to both the S/Cs and the V/Ts that this was essentially just a guide which they could follow if they wished, but that they were free to design their own two-day schedule as long as we received a morning schedule and agenda from each trainee at the end of the workshop which included the following: 1) their goals for their technical training (culminating experience), 2) a list of contact persons in their field and/or at their sites with addresses, 3) a daily schedule of their culminating experience with sites to be visited besides the actual job site, and 4) an itinerary of travel
among the various sites. Each agenda/schedule was to be submitted by the end of the workshop in typed form. There was time allotted within the time span of the workshop for the trainees to accomplish this task. We also encouraged the trainees to solicit a "chain of command" list from their S/Cs for their respective ministries so that the V/Ts would know who to go to for what, when and how when at their sites. This bit of information in itself, I believe, can save volunteers much time and frustration when they arrive on site.

I listened in on various small group discussions and was pleased to see V/Ts and S/Cs sharing expectations candidly; a great deal of valuable information seemed to be transferred in a pleasant, informal atmosphere. The goals and objectives of the workshop were met. Except for two trainees whose specific jobs were not finalized within their sectors, all V/Ts turned in their prospective technical training schedules and goals for their individualized culminating experiences by the end of the workshop. (Note: One trainee finally got his job straightened out and submitted his culminating experience schedule. The other was still uncertain about her actual job when she left for her site after swearing-in, but she feels that there are some possibilities.) The culminating schedules and goals were approved by the training staff as well as the FC permanent staff. Enclosed are copies of the V/Ts schedules and goals submitted to the core training staff.
OBJECTIVE: Introduction to non-teachers' technical training

LOCATION: Lecture room with chairs in a circle or semi-circle

RECOMMENDATIONS:

MATERIALS NEEDED:
- Welcome letters to S/Cs and to V/Is
- Hand-outs of agenda
- Hand-out list of participants
WELCOME TO COUNTERPART/SUPERVISOR AND VOLUNTEER TRAINEE WORKSHOP

The training staff welcomes you whole heartedly to our training site here at Bunda College of Agriculture, we hope to make your stay comfortable and productive. If you have any needs at all, please feel free to contact any member of staff.

Included you will find a list of names of the participants and a schedule of activities. Because of your own time constraints, you may need to modify sessions to be sure and finish the entire agenda before you must leave. Additional time has been designed into each session for more informal type talks. This time can be used to finish additional sessions. We hope that by the end of this workshop, the Volunteer/trainees will have the correct idea about what their job in Malawi will be and how they can best get along in their job. Please do not hesitate to tell it like it is and be firm about the expectations that you have of the Volunteers.

I am available any time for receiving any ideas you may have for improving our Peace Corps Training Programs.

Sincerely,

The Staff,
Roy Clariana
Training Director;
SUPervisor/COUNTernPART WORKSHOP - AUGUST 13, 14, 1984

Monday, August 13

9:30 - 10:30 Welcome, Introduction, Goals and purpose of the workshop
   ( large group )
10:30 - 11:00 Tea Break

INFORMAL WORKSHOPS:

11:00 - 12:40 Session I : Expectations of the supervisor/counterpart for the
   trainees. Expectations of the trainees concerning job/site.
   ( small group by sector )
12:40 - 2:00 Lunch
2:00 - 3:30 Session II : Goal setting for the technical training portion of
   pre-service training 1984 ( PST'84 ). Each trainee will
   generate a list of ideas/goals for technical training ( Sept. 14-
   Sept. 25 ) with their supervisor/counterpart which will be a
   part of the culminating report.
3:30 - 4:00 Tea
4:00 - 5:30 Logistics consultation with training staff/ informal meetings with
   other sector counterparts to get ideas
6:00 - 6:45 Dinner
7:00 - 9:00 Film : The Enigma

Tuesday, August 14

7:50 - 8:50 Language Classes
8:50 - 9:30 Breakfast
9:30 - 10:30 Session III : ( short information session - ICE - in large group )
   Planning technical training agenda/itinerary for the 14th to
   the 25th of September. Trainees plan activities/determine
   individual technical training agendas with supervisors/counter-
   parts to maximize the job site visit. ( small groups )
10:30 - 11:00 Tea
11:00 - 12:40 Session IV : Establishing network. Making a list of contact
   persons/organizations. Continue planning tech. training agenda.
12:40 - 2:00 Closing Lunch
2:00 - 3:30 Session V : Compiling written technical training schedule and plan.
   Goals, strategies, contacts, travel etc.
3:30 - 4:00 Tea
4:00 - 5:00 Continue working on writing technical training agenda ( typed copies
   to : supervisor/counterpart, trainee file, APCT/PCT )
5:00 - 5:30 Closure: Evaluation of workshop

COUNTERPART/SUPERVISOR
James R. Davey
Mr. Ndowi
Mr. Meschner
Mr. McCleod
Mr. McCleod
Dr. Masingers
Mr. Easter
TO THE VOLUNTEER TRAINEE

I hope that the design of this workshop will satisfy many of the hazy feelings that you have now about your jobs in Malawi.

At the end of the workshop, I want you to prepare a training agenda that we will go over together to maximize your final technical training component. The format should be as follows:

1. Goals for technical training
2. Contact persons with names and addresses
3. Sites to be visited besides the actual job site
4. An itinerary (tentative) of travel
5. Other

Sincerely,

Roy Clariana
Goals and Objectives of the Workshop

To begin to establish the working role of the Volunteer Trainee (V/T) and establish a working relationship between the V/T and their Counterpart/Supervisor (C/S).

*For the C/S to explain as completely as possible what is expected of a Peace Corps Volunteer at his job site. (This should include such things as proper style of dress, the Administrative hierarchy in detail from Director or Program Manager all the way to sweepers and how the V/T can optimally interact with each one, the necessity to go through the "proper channels" and what these proper channels are, tips on which working style is most effective at their job site, how much time will be spent in the field and how much in the office.)

*For the V/T and the C/S to set realistic goals concerning what the V/T could accomplish at their job site. The C/S can explain what a typical day, week and month is like at their job site and the V/T can bring out certain "extra skills" he/she has that he/she can bring to the job. With this information, the V/T and their C/S should formulate goals and activities for technical training. These goals and activities may include: types of contact persons the V/T should meet (doctors, lawyers, Indian chiefs), sites to be visited besides the actual job site (colleges, field offices, research stations, model farms, model businesses, clinics...), and activities for the job site visit.

*For the V/T and the C/S to plan an individualized training agenda to be submitted by the V/T at the close of the workshop. It should include:
- Specific names of contact persons and how each may be reached.
- Specific sites to be visited with directions on how to appropriately contact these sites.
- Specific activities to occur during the job site visit.

*For the V/T to work with the Training Staff to determine feasibility, costing needs, travel plans for each individual training agenda.

*For the V/T to begin to make contacts appropriately (letters of introduction, letters of requests for visits to institutions).

*Finally to provide informal time with C/S so that the V/T may ask specific questions that are of concern to the V/T about their work.
TRAINED SCHEDULES FOR THEIR CULMINATING EXPERIENCES
Proposed itinerary, 14th-25th September

14th  Travel, Southbound to Southern Region

15th through 18th  Visit the Regional office.
                     Introduction to the Reg. Officer and his staff.
                     Visit Mulanje and surrounding forests.

19th through 21st  Travel to Zombe and visit the Forestry Research Institute and
                     Zomba Mt. Forest and Liwonde Forest Reserve (Indigenous spp.)
                     and Game Park.
                     Introduction to Mr. Solomon Chipombla, Head, Institute, and
                     Mr. Langes Sitaubi, Sr. Research Officer.
                     Introduction to Mr. Zachari Donosi, Ch. Forester, Zomba Mt.

22nd  To Dedza/Chongoni Forests and Malawi College of Forestry.
      At Dedza, introduction to Mr. Greenford Lipunga, Ch. Forester.
      At College, introduction to Mr. Jacob Palani, Principal.
      Spend night of 22nd in Lilongwe

23rd  Dzalanyama Forest Plantation

24th  Visit Forestry Headquarters and Regional Forest Office, Central Region.
      Depart for Viphya

25th  Visit Viphya Plantations
      Introduction to Mr. David Cornellius and Mr. Anthony Hill

26th  Return to Lilongwe
Table of Organization

Ministry of Forestry and Natural Resources

Minister     Mr. Poulton Ntenje
Principal Secretary  Mr. Anthony Poya
Deputy Secretary    Mr. Andrew Mathotho
Under Secretary  Mr. Somanje

Note: The post of Minister is held by a political appointee. All personnel below the rank of Minister are civil servants.

The Ministry is composed of 5 departments, viz:

Department of Forestry
"  " Fisheries
"  " Geologic Survey
"  " Mines
"  " National Parks and Wildlife

In addition, the newly-formed Environmental Secretariat is a component part of the Ministry.

Each department is headed by a Chief, ie-Chief Forester, Chief Fisheries Officer, Chief Geologist, Chief Mining Engineer, Chief Parks and Wildlife Officer; and Chief Coordinator (Environmental Secretariat).

Department of Forestry

Chief Forester   Mr. Tembo
Deputy Chief Forester  Mr. Winfield Ndovi

4 Divisions within the Department, headed by:
Assistant Chief Forestry Officers (4) viz-
Asst. Chief Forestry Officer for Forests
"  "  "  " Management Services
"  "  "  " Wood Energy
"  "  "  " Viphya Plantations

Asst. Chief for Forests- Mr. Goodson Sakanda
"  "  "  " Mgt Services- Mr. Rodney Nkaonja
"  "  "  " Wood Energy- Mr. William Chamayere
"  "  "  " Viphya Plantations- Mr. David Cornellius

Note: There was formerly a 5th division, ie Forest Industries Division. As of 1st July 1984 this has become a private commercial enterprise.

Headquarters of Department of Forestry is located in Lilongwe.
The Department is composed of three Regions, ie South, Central, and North. The Division of Forests is represented in each of the Regions by a Regional Forestry. Officers:

Regional Forester, South  Mr. Louis Ngambi
"  "  " Central  Mr. Lamji Nyirenda
"  "  " North  Mr. Wiseman Bello

The Regional Forestry Officers in the South and Central Regions each have (3) Assistant Regional Officers, in charge, respectively, of Protection, Timber Plantations, and Wood energy.
In the North Region the responsibility for Timber Plantations has been assigned to Viphya Plantations;
consequently there are but (2) Assistant Regional Forestry Officers.

An incomplete roster of Asst. Reg. Forestry Officers:

South ------------------ Protection
Mr. Michael Hawkes-Timber Plantations
------------------ Wood Energy

Central ------------------ Protection
Mr. John Tewson- Timber Plantations
------------------ Wood Energy

North ------------------ Protection
------------------ Wood Energy

Some personnel in Regional Office, Central Region:
Mr. John Pallot
Mr. Mike Russell

Responsibilities of the divisions:

Foresty Management of the forest estates (consisting of exotic species) and the indigenous forests.
Water catchment operations
Protection, fire, trespass, disease and insect control.

Management Service:
Forestry research
Training
Planning (management, economic, surveys, etc.)

Wood Energy
Fuel wood plantations
Forest extension
Publicity, i.e. schools, visual aids, National Tree-planting Day

Viphya Plantations
Management of the plantations
Research i.e. Fire, Pest and Disease Control
(NB Asst Plantations Mgr post is presently vacant)
Technical Training Travel Itinerary & Contact List

Thurs. Sept. 13th.  Travel by Express Bus to Zombo.
Depart 6:30 A.M., Arrive 10:30 A.M.
Meet Bill Easter for transport to Magomero.

Fri. Sept. 14th.  Tour Malawi Council for the Handicapped
Rehab. Centre in Magomero and interview
staff.

Sat. & Sun.  Orientotion to Magomera area.
Sept. 15th-16th.

Mon. Sept. 17th.  Travel by bus to Limbe, visit Malawi Council
for the Handicapped Main Office, Orthopedic
Workshop and Weaving Factory.

Tues Sept. 18th.  Determine long-term housing assignment at Malawi
Council for the Handicapped Main Office in Limbe
and take appropriate arrangements.

Wed. Sept. 19th.  Return by bus to Magomero and attend Case Conference
Session at Malawi Council for the Handicapped Rehab.
Centre.

Thurs. Sept. 20th.  Take bus to Blantyre and tour Queen Elizabeth Hospital
and/or Malawi Against Polio Clinic.

Fri. & Sat.  Orientation to Blantyre area.
Sept. 21st & 22nd.

Sun. Sept. 23rd.  Travel by Express Bus from Blantyre to Lilongwe.

Contacts:
In Magomera - Bill Easter or Sue Varney,
Malawi Council for the Handicapped Rehab.
Centre - 534-280 or 534-281

In Limbe - Mr. Mbackeani, Secretary/Registrar
Technical Training and Travel Agenda for William E. Bates
Integrated Rural Development/Systems Analyst/Programmer

1. GOALS: - To familiarize with operations of Plant and Vehicle Hire Organisation (P.V.H.O) by visiting sites in Blantyre and Lilongwe.

- To be introduced to technical support personnel at the Blantyre Office of I.C.L. (International Computers Ltd.)

- To meet with consulting staff of the U.K. Crown Corp. during their current engagement with P.V.H.O.

2. CONTACT - Mr. Alasdair MacLeod

Cheileka Road,
Blantyre
Tel. 633-976

3. OTHER SITES: P.V.H.O. Regional Shop
Mandala Road
Lilongwe

4. TRAVEL - Aug. 26/27 BUNDA COLLEGE - BLANTYRE (RETURN) Via Air Malawi
Sept. 13 BUNDA COLLEGE - BLANTYRE Via Express Bus
Sept. 24 BLANTYRE - LILONGWE Via Express Bus

5. OTHER - W'ILL REQUIRE FUNDS FOR HOTEL AND MEALS WHILE IN BLANTYRE.
Memorandum

FROM: William P. Vollmer, PCT

SUBJECT: Alternative Placement Possibilities

Due to the present difficulties with Mo. Co. Ho. and your request for further input on my interests, abilities and perceived possibilities in the field, I would like to offer the following options for consideration in my placement. (See Resume attached).

1. My primary skill areas are counseling and training. Stateside, a large part of my function as director of a human service agency included training and up-grading the helping skills of 12 paid staff and 65 volunteers. Given a 50 per cent annual turnover, training and training coordination occupied a large part of my time.

An impression I have is that Peace Corps is sorely lacking in the area of mental health services. Data from Washington D.C. indicates significant numbers in alcohol abuse, suicidal turnover, unwanted pregnancies and depression related directly to placement stress. At present, counseling is provided to PCTs' and PCVs' only to the extent of a friendly staff ear, if available.

What I would suggest as a first choice for placement is a combined function of training/training consultation and counseling services. These efforts could be directed toward PCTs' in training, PCVs in the field and PC staff when appropriate.

2. Another part of my background in human services was community education, in the areas of health, alcohol abuse, drug abuse and positive health lifestyles. I have extensive experience working with the printed media, radio and television. Given the extent of alcohol abuse and poor driving habits in Malawi, I could feel useful working for the Ministry of Transportation on media releases dealing with drinking and driving and highway safety.

3. While staying in the village I noticed that although the basic materials are available, there is a scarcity of simple hand tools (shovels, spades, rakes, long-handled hoes, hammers and American-style axes). I have little experience in metal-working (two years as a marine machinist, twenty years ago), but I have found the necessary instructional materials available through ICE and Peace Corps library. Further, Peter Wescott (a PCT in my group) is a certified blacksmith and has offered to consult. What I could envision is a hand-tool design and construction demonstration project, either mobile out of the back of a truck or stationary in a rural setting. This project could introduce labor-saving hand-tool design and preparation to farmers and metal-workers.
4. I lived for 8 years on a farm and kept up to 500 chickens, ducks, geese, turkeys and guinea fowl at different times. Malawi poultry raising and egg production practices in the rural areas are haphazard at best and I have noticed numerous practical changes that could be introduced. Perhaps I could be of some use to the Ministry of Agriculture.

5. Finally, I was a certified Emergency Medical Technician for two years although I never practiced. My certification expired two years ago. I wouldn't get very excited about it, but would consider a placement in the Ministry of Health.

Please be advised that although the suggestions above represent a priority of interests to date, I do not pretend to any overall sense of appropriate-feasibility or usefulness. On that basis, be assured that I am more than willing to consider other alternatives as well as modifications of the above.
1st August, 1984

Technical Training and Travel Agenda for William E. Bates
Integrated Rural Development/Systems Analyst/Programmer

1. GOALS: - To familiarize with operations of Plant and Vehicle Hire Organisation (P.V.H.O) by visiting sites in Blantyre and Lilongwe.
   - To be introduced to technical support personnel at the Blantyre Office of I.C.L. (International Computers Ltd.)
   - To meet with consulting staff of the U.K. Crown Corp. during their current engagement with P.V.H.O.

2. CONTACT - Mr. Alasdair MacLeod
   P.V.H.O. Headquarters,
   Cheileka Road,
   Blantyre
   Tel. 633-976

3. OTHER SITES: P.V.H.O. Regional Shop
   Mandala Road
   Lilongwe

4. TRAVEL - Aug. 26/27 BUNDA COLLEGE - BLANTYRE (RETURN) Via Air Malawi
   Sept. 18 BUNDA COLLEGE - BLANTYRE Via Express Bus
   Sept. 24 BLANTYRE - LILONGWE Via Express Bus

5. OTHER - WILL REQUIRE FUNDS FOR HOTEL AND MEALS WHILE IN BLANTYRE.
Veterinary Technical Training Agenda
Anthony McNich, Herbert Redman

1- see typical field operations
2- familiarize with lab resources and limitations
3- start establishing contacts with counterparts
4- visit worksites and meet support staff
5- become aware chain-of-command and channels-of-communication
PROPOSED SITE VISIT PROGRAMME: PEACE CORPS VETS.

Friday 14th September 1984 : Visit Central Veterinary Laboratory, Lilongwe.

Saturday 15th September 1984 : Free

Sunday 16th September 1984 : PM - Leave for Blantyre - Night at Mikolongwe Veterinary Station.

Tuesday 18th September 1984 : Visit Blantyre (Clinic, Dairy, Abattoir).

Wednesday 19th September 1984 : Visit Dip tank in Blantyre area, and Npemba Quarantine Station and Blantyre Laboratory.

Thursday 20th September 1984 : Visit Thyolo Veterinary Office and one Estate or/and small holder dairy farms.

Friday 21st September 1984 : Mulanje Veterinary Office.

Saturday 22nd September 1984 : Visit ADMARC Farms.

Sunday 23rd September 1984 : Return to Lilongwe.

Dr. K.E. Mazemera
DEPUTY CHIEF VETERINARY OFFICER (DISEASE CONTROL)
TO: Roy Clariana, Training Director
FROM: Leland Ludwig, PCV Trainee
SUBJECT: Technical Training Director
DATE: August 8, 1984

My goals are to meet with DEMATT staff, advisors and supervisors, and to begin establishing effective working relationships with them and other DEMATT personnel.

I expect to meet a number of DEMATT clients, and begin to learn how best to be of assistance and what is expected of me. It is likewise important to become familiar with the roads which I shall be using, and the locations to which I shall be travelling.

The attached itinerary will accomplish the above goals. My daily location, phone numbers and the people with whom I shall be travelling are also noted.

Note (*) In case of emergency contact DEMATT Northern Region office in Mzuzu by calling 332-423
29th August,

Ministry of Works and Supplies
Private Bag 316
Mzuzu,

Mr. K. J. Sturm - Chief Civil Engineer, Rural Roads

Dear Mr. Sturm:

I enclose our telephone conversation on the 29th day of August 1984.

I have enclosed my technical training schedule for your review and comment. The schedule reflects the revised concrete material testing dates which were decided upon in the above reference teleconference.

To facilitate planning, the Peace Corps requests written confirmation by the 15th of September 1984 on housing and transportation which will be provided. It is my current understanding, that a three bedroom house with stove, refrigerator and pottery will be provided. The location is Chimaliro Estates, Mzuzu. For personal transportation, a motor-cycle will be provided through the United Nations Agency that is funding the VARB program.

If there are any questions on Peace Corps policies or support services please contact Charles Blake at 721 611/721 845.

Sincerely,

[Signature]

Lee Wescott
Peace Corps Trainee

Charles Blake - Associate Peace Corps Director

III. FOLLOW-UP WITH S/Cs FOR ASSESSMENT OF TRAINEES AND TECH. PROGRAM

Thank you letters to all S/C participants were mailed out by the 16th of August. Less than a week after the workshop, I contacted S/C participants from each sector involved by phone and solicited feedback about the workshop, the V/Ts and about the proposed schedules/agendas for the V/Ts technical training (culminating experience). Culminating experience agendas were confirmed and some of the specific logistics about transport, accommodations etc. were discussed. I wanted to have a good idea about what each sector would provide so that I could write up a valid request to the APCD/Administration officer, Mr. Chibambo, in order to receive the rest of what was necessary logistically to facilitate the success of this portion of the technical training component for the non-teachers. None of the S/Cs expressed any concerns about the suitability of the V/Ts and they seemed excited about the V/Ts joining their staffs. They expressed gratitude about the opportunity to have met with them and to be able to have a part in their actual in-country technical training.

Follow-up with APCD/Administration as well as S/Cs concerning logistical arrangements proved necessary up until and sometimes through the culminating experiences.
IV. LOGISTICS (FINANCING) FOR CULMINATING EXPERIENCES

Enclosed is the proposed "budget" for the culminating experience for each technical V/T which the APCD/Administration officer, Mr. Chibambo, and I worked out. The TD and I purchased bus tickets for the V/Ts to leave Lilongwe and made arrangements for some V/Ts to be picked up by their escorts from various sectors, but V/Ts were expected to fend for themselves as far as transport and accommodations were concerned once they left Lilongwe until they returned upon the completion of their technical training.

V/Ts received kwacha for all proposed transportation not already provided for by their ministries or wherever and received the standard walk-around allowance of K4 per day when room and board was provided, the standard of K7 per day where room only was provided and the standard K12 per day where neither room nor food was provided. All V/Ts received payment for the 13th through the 28th of September.

Due to the support of the S/Cs from various ministries and non-governmental organizations, substantial training costs were saved by PC/Malawi.
V. CULMINATING EXPERIENCE

All V/Is involved in the culminating experience had left Bunda by the 16th of September (although most left Lilongwe around the 14th) and all returned by the 26th of September. Due to the petrol shortage around this time, some of the V/Is returned before they had initially planned.

All V/Is turned in a culminating experience report before swearing-in on September 29th. Initially, the training staff had planned to include each individual culminating experience report in this report but, at the request of the trainees, decided not to include these reports in order that the trainees might respond freely about ministry officials, staff, housing and their personal feeling about such issues.

All participating V/Is said that the experience had been valuable if not personally motivating. Many expressed concerns about their housing, prospective staff, undefined jobs and lack of necessary materials and facilities but stated that the culminating experience should be included in all future trainings because without such an opportunity to get an idea of what their job and site environments are, trainees would be making a two-year commitment with little or no idea of what lay ahead.
VI. CONCLUSION

The technical training component for non-teacher V/Ts for PST'84 was a success. The goals of providing opportunities for S/Cs and V/Ts to meet, share expectations and information, visit their respective sites, make relevant contacts and to begin establishing working relationships with co-workers were met. This approach (trainee-counterpart workshop/culminating experience), not attempted before in Malawi, is good to implement into a training program where there are V/Ts with a wide variety of technical professions. If, for instance, there were just two sectors (ie. vets and agriculture) represented by the technical V/Ts, perhaps other approaches would prove more feasible, but for a motley crew of V/Ts with many diverse jobs and experiences, we found the approach used to be most fruitful. Not to say that there were no problems, but at least these came to our attention BEFORE V/Ts arrived on site to begin their work and gave us a chance to work through them. Because of it's effectiveness, this model can be used in a similar program in future trainings with little or no modification.
Language Training
REPORT ON THE LANGUAGE TRAINING PROGRAMME: OMNIBUS 1984

1. THE LANGUAGE INSTRUCTION PROGRAMME

The 1984 Language Training Programme for United States Peace Corps Trainees was held at Bunda College of Agriculture from July to September 1984. There were five language teachers including the Coordinator: Mr. Fletcher Kaiya, Mr. Newton Kalengamaliro, Mr. Dece Kankondo, Mr. Emmanuel Muyenza and Mr. Samu H. Saku.

These five were selected after the conduction by Miss Florina Pheko of the Peace Corps Malawi Language Teacher Training Workshop (May 22 - May 25, 1984) at Bunda. The objective of the workshop was to identify prospective Language instructors and equip them with skills that were to make them effective Chichewa teachers for Peace Corps Malawi.

The Language workshop made the selected language teachers know what was expected of them with regard to the Audio Visual method that they were supposed to employ in their teaching of Chichewa. This made their subsequent work a lot easier.

During the first week before the trainees arrived the language teachers and the core training staff met together and planned the whole training programme. It was exciting to watch the whole Peace Corps Training...
Programme coming into shape. This time was also used to write the lessons, based on the Audio Lingual Method. Everybody participated, including the volunteers who acted as resource persons as well as evaluators.

The training staff were given opportunity of knowing the trainees before their arrival. Thus the welcoming of the trainees at the airport, the dinner, and their ride to Bundu College later and settling down went on well. It was like a one big happy family.

The support services provided for the Peace Corps Training Programme made the whole programme particularly the language instruction start well with both teachers and trainees highly motivated. They were five classes with an average of 6 trainees in each. In the following weeks or J.x week, the trainees were often regrouped according to skill. This enabled the teachers teach nearly all the trainees.

Due to the interest the trainees showed in language, their acquisition of the language was unusually fast. When they had their Mock FSI test in the 6th week, their results were very encouraging. No doubt that in the actual FSI test they did well as is shown below:

</tr>
</tbody>
</table>

3/21
Based or the FSI results alone we could conclude that the language instruction went well. What the trainees need now is practice in their respective sites.

However there are a few things worth noting for the improvement of similar programmes in future. These suggestions are included in the Recommendations section of the final report.

The language manual developed for this program is included separately.

Finally, on behalf of the language staff I would like to register our appreciation for the opportunity given to us by Peace Corps Malawi to be part of their Peace Corps Training Programme. We enjoyed the participation which has become one of our most valuable educational experiences.

Thank you.

Samu M. Samu

FINISH THE SESSION IN TIME FOR Q'S AND A
CROSS-CULTURAL FILMS

The 16 Independence Anniversary Celebrations

Take a few moments to reflect on what you saw and heard. Celebrations like this are a significant aspect of a Malawians life both for rural and urban dwellers but for Americans it is probably a new phenomena, that is, typically we have not attended activities like this in the US. It is difficult to draw analogies since our thought patterns socially are not the same but perhaps it is like attending a football or basketball game to us. There was much more going on in the session than just the film, specifically I was observing the Malawian staff and visitors reactions to what was being shown, it seemed that they really enjoyed the different groups very much and they laughed or commented on accurances that seemed to me to be common or undeserving of comment (from my viewpoint). 2 Both the Junior staff and senior staff reacted in the same or similar ways to what they saw, thus reinforcing in me the idea that this social activity transcends socio-economic levels.

I was particularly interested to listen to the speech by President Dr. Banda. His ideas and concerns will automatically become Government policy here and so having and awareness of his priorities gives me a good handle on the development priorities in Malawi and so the PCV role in that development. I was disappointed that his speech was so short. (It is important to remember (I think) that Dr. Banda is the first President of Independent Malawi and as such he is an important Independence figure perhaps like say George Washington would be to us.)

Soil and water Conservation in Malawi

From my point of view (American) this was the better film. I enjoyed the photography in the game parks of both the animals and the scenery. The portion dealing with forestry and fisheries gave me some ideas on these two industries and their importance here (kuno) and the last section on soil conservation was dear to my heart, as a PCV I tried to educate the people, particularly the younger people in my community, to the need and the methods of soil conservation and since it is a problem here also, maybe it is another simple secondary project someone might want to do.

In watching the Malawians during this film and talking with them after the film, I found out that most preferred the first film about people together and dancing and speech making where as I and most of the Americans seemed to prefer the film about the parks, animals, fisheries and so on that didn’t show people as the main topic. In terms of integrating the principle, I’ve noticed that in our language we have only three singular personal pronouns for people I/ME, YOU, HE/SHE for reference to self, reference to the one you are talking to and reference to someone away that you are not talking to. But the Chichewa adds a fourth for talking in reference to someone that is near but not in the conversation. Also it somehow seems more natural for me to say the verbs come and go but I think for a Malawian go and come is more natural (a: k a Malawian, I would like to get this clear in my mind). If that is true then they think of people being together as natural and so you go away but then come back, but come and go suggests that it is more natural to be alone and people come to you but then go away after a while.

Seriously, I don’t want to over analyze but the bottom line is that maybe there was more going on with the films session and in other sessions than you have realized. I got a lot out of the session.

II. SERVICES OF THE U.S. CONSULAR OFFICE

- U.S. passport issuance
- Information on visa requirements and travel to neighboring countries
- Notarial services: authentications, acknowledgements, oaths
- Issuance of immigrant and non-immigrant visas for travel of non-U.S. citizens to the U.S.
- IRS tax forms (but no advice)
- Absentee voting applications and information
- Registration of U.S. citizen visitors
- Selective service registration
- Assistance to U.S. citizens arrested and imprisoned abroad
- Administration of the Ambassador's special self-help fund
SESSION NAME: ROLF LEHMAN (EEC)  TRAINERS: CLARIANA  NO OF TRAINEES: 18  DATE: 3/9/84

OBJECTIVES: TO INFORM V/T ABOUT EEC AND ITS PROJECTS IN MALAWI

ACTIVITY  DESCRIPTION  TIMING

AN ECONOMIC ADVISOR WITH EFC, LILONGWE, MR. LEHMAN SPOKE ABOUT THE EUROPEAN ECONOMIC COMMUNITY (EEC) IN MALAWI AND ABOUT ITS PROJECTS; LAKE FISHERIES, APPROPRIATE TECHNOLOGY ETC.

LOCATION: LECTURE ROOM 2, BUNDA COLLEGE

MATERIALS NEEDED: CHAIRS PLACED IN A CIRCLE OR SEMI-CIRCLE

RECOMMENDATIONS:
WHAT WENT WELL?
WHAT DIDN'T?
NEXT TIME?

EXCELLENT! TRY TO GET MR. LEHMAN TO COME SPEAK AGAIN.
SESSION NAME: RELIGIONS IN MALAWI

OBJECTIVES: TO INFORM THE TRAINEES ABOUT THE DIFFERENT ACTIVE RELIGIOUS GROUPS IN MALAWI AND WHAT THEY ARE DOING IN MALAWI TODAY. ALSO, ABOUT BASIC PHILOSOPHIES. WE HAD FOUR QUEST SPEAKERS.

**LOCATION**: LECTURE ROOM 2, BUNDA

**RECOMMENDATIONS**: Tea served during the session was nice.
**WHAT WENT WELL?**  
G & A sessions went well.

**WHAT DIDN'T?**  
Perhaps have trainees a bit more prepared for sessions; excite them with possible questions

**NEXT TIME?**  

The Village Live IN

The village stay has become an integral part of PC training worldwide, indeed many countries run the entire PST program at the village level with the trainees spending the entire program with a family. There will be significant learning opportunities in such an environment in every aspect of training. Inevitably trainees (some) fear this portion of training and anxiety can build up and must be honestly addressed by the training staff. Very often, when training is finished, the village stay receives the highest rating of any activity and is the most fondly remembered portion of training.

The village live in for this program lasted for 5 nights with no scheduled sessions during that period. Extreme feelings of isolation and boredom were experienced by the trainees (similar to what they will experience the first weeks at their PCV sites). The more creative trainees created activities and entertainment for themselves, many simply sought escape in one form or another. Both are valid strategies for dealing with the excess time and boredom that occurs but the first is at a higher level of self-actualization than the second. (Escape includes all the range from reading during all the day light hours and not interacting with any family members all the way to just "freaking-out" and leaving the family live in site all together) The highest level of self-actualization could be reached if the trainees went in with a purpose, like: co an appropriate technology project or teachers could teach some subject at a primary school, ags could do some small scale extension, health trainees could run a short course, business advisors could help a small shop set up book-keeping and so on. Whatever else happens in the village good or bad, the village visit is an extremely valuable learning opportunity that can accomplish goals that can not be approached in any other way.

Included:

Family Visit handout
List of family visit articles handout
List and Map of the family visit sites
Family Visit
(or Rural Live-in or Village Stay)

What it is NOT:

1. It is not a test to see if you can "make it".
2. It is not a preparation for the lifestyle you will live as a US Peace Corps Volunteer.
3. It is not to have fun (through many Volunteer trainees do).

What it is:

Life in Malawi means life in the Village. In your role as a Volunteer, you will be an agent of change in this society with specific moral responsibilities. Some of you may influence tens of people; others of you will make decisions that could ultimately influence tens of thousands of people.

Your living conditions as a Volunteer in Malawi will be the expatriate style of life. You will stay in a western style home, eat western style of foods, and most significantly, you will probably 'hang-out' with expatriates for a high percentage of your time here. This will colour very much the way you see life and people here. Very often, westerners living in such a closed community develop and perpetuate a very unrealistic view of "the way things are" in Malawi (or whichever country). Constant interaction with other westerners confirms this view as "truth". A lot of this "truth", if viewed from a different perspective will be seen to be patently absurd. Decisions based upon this "truth" could be harmful or at best ineffectual.

The village visit is a very tiny step to provide information to you during training and to begin a process of gathering information at the village level so that you can be an informed member of change.

(Perhaps this emphasis by PCVs on people is why a PCV with little money can have such a profound effect on development, and also why other organizations have the problems that they have.)

Think about it.
FAMILY VISIT list of articles to be given out on Saturday night

- candles/matches
- Surf detergent
- mosquito coils
- sugar
- cooking oil
- bath soap
- toilet paper
- large plastic cup
- tea
- peanuts

FAMILY VISIT list of things that you might want to take

- 2 sheets/2 blankets & pillows
- camera and film
- language lessons
- towel and wash clothes
- deck of cards/frisbee/ball
- bock, writing materials, stamps
- PC medical kit with insect repellent
- chocolate (bed time snack)
- gift for family? (ask language teachers)
- flashlight
- family photographs
- diary
- water bottle/canteen
- sunscreen

We will have time in Lilongwe (about an hour) to shop before we go to the picnic at Charles Blake's house on Saturday.

APPROXIMATE SCALE IN KILOMETERS...
Recognizing the importance of the village visit, we would like to express our support of it and suggest some changes to enhance its effectiveness. We feel it is the key element in the training program and that it provides functional awareness of Malawian culture and lifestyle.

1. Most in-class cross-cultural training should be condensed. In-class efforts have been characterized by minimal information transmission and redundancy. Total sessions should be reduced to two or three afternoons.

2. Trainees should have two or three pre-visit contacts with their assigned families before the village stay. Tensions would be reduced, trainees would have time to deal with individual concerns, and staff would be fully oriented to person and place before the fact.

3. Physical placement should be made (and could be made) in adjacent villages. No more than a 30-minute walk should separate any two trainees. This would minimize contact and transportation problems and save time and expenditure.

4. Crisis preparation and contingency planning should be considered the most important part of visit preparation. Each trainee should have an agreed-upon emergency plan. The fact that a trainee had a medical emergency which required 5 1/2 hours between onset and treatment is not acceptable.

We have considered these suggestions extensively, and perceive them as feasible and practical. A response from you would be appreciated, and we will be happy to give further input.

cc: Charles Blake, Roy Clariana

Bill Volkmann
Bill Hoffman
Max Sashar
Bill Bolas
CONCLUSION:

THIS MUCH TIME DOES NOT NEED TO BE SPENT ON CROSS-CULTURAL ACTIVITIES.
MORE RESOURCE PERSONS RIGHT AROUND OR NEAR THE TRAINING SITE SHOULD BE
USED. PERHAPS MORE HANDS-ON EXPERIENCE WOULD STRENGTHEN THIS COMPONENT.
REFER TO THE CROSS-CULTURAL SECTION IN THE LESOTHO TRAINING MANUAL WHERE
TRAINEES DID RESEARCH IN AREA STUDIES IN VILLAGES NEAR THE TRAINING SITE
AND THEN DID PRESENTATIONS TO EACH OTHER.
CROSS CULTURAL AND TRAINING AT SANGA

by Rusty Klinger
TRAINING AT SENG A BAY

The trainees visited our site, PCV, Rural Industries PCVs for two days.

Activities:
Bees: Two beekeepers were visited and a wild swarm of bees was observed, and the Kenya Top Bar Hive that the rural farmer built was demonstrated, wherein the bees were to be transferred. The second farmer demonstrated a hive where the bees had absconded after a transfer which showed the trainees the possibility of failure in the field. This field visit also exposed the volunteers to rural living along the Lakeshore area, and traditional Yaow lifestyle. Spontaneously, many trainees got involved in the pounding of maize.

Also demonstrated was the similarly styled beehive at our residence. Many questions were asked and a number of trainees showed a keen interest in bee keeping as a secondary project.

Appropriate Technology: A short talk was given by the Klings on AT and rural development, e.g. farmers identifying their own needs etc.

An evening of traditional dancing in a nearby village was enjoyed by all.

Traditional Cooking: One day was filled with outdoor traditional cooking where trainees actively participated in preparing Malawian dishes, together with many of the local ladies.

Chitala Farm Institute: (a demonstration and learning facility for farmers). was visited where the trainees were exposed to mud stoves, 80 gal storage jar and the closing ceremony of a women's training program.

AT DEMO AND TALK AT BUNDA COLLEGE

Three cement storage jars for grain or water were built with the trainees. Much interest and enthusiasm was demonstrated by a handful of trainees, and it is anticipated that this activity will be carried to the field.
A simple loom was demonstrated, and handed over to an eager trainee for use at her site.

A java type mud stove was built with the trainees, to demonstrate reducing fuel consumption and no-cost stove building.

Various pamphlets and brochures were handed out to trainees e.g. Biogas, weaving, compost toilet, rabbit raising, beekeeping, natural dyeing, evaporative cooler, mud stoves.

An informal discussion was held on various funding agencies available to PCVs for projects in the field.

An ad lib talk was held whereby we answered questions of previous PCV experiences, cultural nuances and general day-to-day life in the Malawian community. This was a very active meeting and lasted much longer than anticipated.
MOTORCYCLE TRAINING

Report by PCVL, Lenny Klinger
EVAlUATION OF MOTORBIKE TRAINING/PEACE CORPS MALAWI 1984

1. Q. DID YOU CONDUCT THE COURSE AS PRESCRIBED? IF NOT, HOW AND WHY DID YOU ADAPT IT?

Basically, I did, but I also adapted it to the situation here in
... As I held that night school
films (in the evenings only), we had all the time to discuss riding
motorcycles. I had PC Trainees using most of the allotted time
given to me by the PCT Director with the Motorbike on the range.
The scheduling of bike training lasted from August 29 to September
4, from 1 pm to 5 pm.

Starting on Wednesday 29th August at 3 o'clock, I started with
the basic introduction of the course, followed by interacting
sessions with on the range riding as applicable. Many classroom
sessions described in the Trainer's Manual are not applicable to
PC/Malawi, e.g. insurance, helmets etc. available to them.

On Sunday September 2, I split the PC Trainees into 2 (two) groups
(4-5), and we went riding within the area of the training site,
which has only dirt roads and fields, intercepted by pathways.
Most trainees as Volunteers will encounter much similar terrain
on their jobs. And for the city riders, as well as the other
trainees, it taught balance and shifting gears in an unfamiliar
course. It also became a new adventure in riding. In this trail
riding we experienced furrows, sand, rocks, ditches and hills not
to mention people, goats and chickens.

After these activities PC Trainees were ready for tarmac, trucks
and cars.

We went through range exercises, numbers 1-24, 27, 29, 30, 32 to 35,
37, 40 and 41. Range exercises 28-39 were included in the field
riding. Training averaged 3 1/2 hrs. per day. The first three days
were spent on the range. The following two days on the field, and
the next two in city traffic and field.
I would like to point out that in the Instructor's Guide, Table 5.1, the total instruction hours has 30 hrs, which we exceeded by 9½ hrs. Everything went well. Myself and the assistant first introduced the PCTs to light traffic, roundabouts and turns, and of course, stopping; as well as how to follow in a group.

An average of 3 hrs. a day was spent both pavement riding (city) and field riding. The total number of hours riding for the whole course was 39½ hrs. of on-bike riding. This does not include films that came with the training material, and discussion in the evenings.

After realizing there was insufficient time for road and traffic riding, I asked the Training Director for more time during the last week of training, i.e. from 24-28 September. This enabled the PCTs to have more confidence in traffic driving. During this time, I went over more maintenance procedures.

It so happened that we had a Fisheries PCT joining the training group after his Stateside training which made him 8½ weeks late. He needed motorbike training.

At present, I am not passing him (R.J. Lovullo) on motorbike training because I am waiting for a reply from your offices, letting me know if there is a minimum amount of hours that must be given in this course. He has good riding skills.

Also Becky Allmon, a RPCV, who was medivaced for a motorcycle accident, returned a week before the end of training. I am waiting for a reply from the P.C. Medical Office to see if she has clearance to ride a motorbike. If so, I know B. Allmon since we went through training together, she is basically a good rider, but has some rough edges that I feel she could overcome with some training. I plan to start Allmon and Lovullo on training next week, but in both cases I need to know the minimum amount of hours required.
While I was on the road with part of the group, the latecomer was with my assistant with the remaining part of the group for 3 hrs. a day for 5 days. The latecomer has experience on motorbikes in fact he states he owns 250c back home.

2. Q. WHAT WOULD YOU DO DIFFERENTLY IF YOU CONDUCTED THIS COURSE AGAIN?

I would change nothing. I have not as yet, received the evaluations back from the PCTs, but all the positive verbal feedback was well received. One of the experienced PCTs mentioned that he had taken an inferior bike training course at college.

What I would like to see however, is perhaps the Motorbike Trainer be part of the whole training group from the beginning to the end of PST. This would be advantageous to the PCTs in having the instructor always available, thus enabling them to use their free time on the bikes, even after motorbike training has finished. After bike training until "Swearing-in", the PCTs got no practice in bike riding at all. In this case it was a period of 18 days.
3. **WHAT DO YOU SEE AS THE CRITICAL FACTORS IN EFFECTIVE MOTORCYCLE TRAINING?**

As much time on motorcycles as possible while in PST. The more time available, the more confident a PCT will be which is a major factor in producing a safe rider.

Having the correct number of motorcycles would have helped. Not having the right size helmets was a distraction and some cases possibly dangerous. I suggest that helmets be obtained and fitted during CASI, then forwarded onto the host country.

4. **DURING WHICH WEEKS OF THE PST WAS THE MOTORCYCLE TRAINING CONDUCTED? WAS THIS TIMING APPROPRIATE? HOW WOULD YOU CHANGE IT?**

The training started within week 5 and went into week 6 for seven (7) days. Again in week 9 for five days.

The timing was appropriate, as it provided a break in routine. Perhaps the training could have started during week 4. By having the Instructor permanently present would be beneficial to the PCTs as mentioned in Q 2.

Each training has different scheduling, thus it's difficult to say in what week it should start. However with PC/M, I think it would be appropriate to start motorcycle training early in training to make maximum use of time. In starting early with a period of 2 weeks (the least) bike training, the Instructor could facilitate in other activities. This would also allow the PCTs to ask the Instructor for more instruction, during "off hours".

4/......
5. HOW ADEQUATE IS THE MAINTENANCE COMPONENT OF THE TRAINING?
   IF NECESSARY, HOW CAN IT BE IMPROVED?

   It was inadequate. Film strip #7 was not received. I am a mechanic, so it was not difficult to go through maintenance procedures.

   An alternative: The agency used by PC for motorcycle maintenance, could be utilized in this section of the course, for perhaps 2 hrs. to teach basic maintenance skills. I found the PCTs to be hungry for knowledge on maintenance - perhaps more than they need here in Malawi.

6. WOULD YOU RECOMMEND THIS TRAINING FOR PC USE WORLDWIDE?

   Yes. I feel that PC/Washington should make it mandatory for PC Worldwide to have this training where applicable. If not, PC countries are in a position to be facisical.

7. ANY OTHER COMMENTS?

   In my own training (PST 83), we had only 2 days of training and not enough motorcycles. Because the Training Staff were too busy to accompany beginners for practice riding after hours, they (PCTs) were unable to receive extra training where needed.

   I suggest that PC/Washington should stipulate no less than 2 weeks motorcycle training, and perhaps the motorcycle instructor could be on hand during the entire PST.

   Again helmet sizes should be organized at CAST/Staging, and then helmets sent to host country before PCT's arrival in country. Yes! PC/Washington should set standards for helmets. Here in Malawi full face helmets are unavailable. Recently PC/M requested PC/US to purchase full face helmets. Motor cross (racing) full face helmets (a lot too small) were sent. This type of helmet is not practical for street riding, as it tends to obstructs vision.
Also, the Country Desk Officer, should be aware of those PCT coming to
country late who need motorbike training as well as the RPCVs. This
has and will put a strain on the motorbike trainer who has other duties
besides motorbike training to fulfil, and who also feels obligated to
give training to these two extra people. So if some coordination could
be done with CDO, training staff and recruitment in PC/W, these problems
could be eased here in the field.

Leonard Klinger, PCV
MOTORBIKE TRAINER.
