

## MATH 111: Techniques of Calculus II

**Section 1: 110 Osmond Lab, TR 10:10 AM - 11:00 AM**

**Section 2: 106 Osmond Lab, TR 1:25 PM - 2:15 PM**

---

The following activities due before the next class.

1. Join our Piazza site.

<https://piazza.com/psu/spring2015/math111>

Respond to the post titled "Introduce Yourself!"

2. Register for Poll Everywhere.

<https://www.polleverywhere.com/register?p=3evcf-n5fv&u=xEvo12hB>

3. Obtain a TI-82/83/84 calculator or equivalent.

- If you do not have a TI graphing calculator, you can purchase one from local retailers like the campus bookstore or Best Buy.
- You can order used graphing calculators online at Ebay and Goodwill. I recommend getting a TI-83 Plus (they tend to be the best value).
- If you do not want to purchase a calculator, there are some very good emulators for your phone, tablet or computer. I recommend WabbitEmu. It can easily be run on any android tablet or phone. If you plan to bring your (windows, mac, linux) laptop to class, you can use WabbitEmu to emulate a TI-84. For help with this, you can check out this youtube video <https://www.youtube.com/watch?v=8FbN-iSRiCE> and this wikiHow <http://www.wikihow.com/Get-the-Ti-83-on-Your-Computer>

Note: If you're not very comfortable with technology, it's best to just buy a calculator. If you need to order a used one online, I have some extra calculators can you can rent from me during class.

4. Log onto Angel and take the first quiz. It will ask you some review questions about the syllabus.
