CONNECTING TO WIRELESS 2.0 NETWORK

You no longer need to connect through the VPN Network on the new Dell laptop. The old laptop, however, has an old wireless card and cannot connect to the Wireless 2.0 network.

If the Wireless 2.0 software has not previously been installed, visit: https://www.work.psu.edu/access/dot1x/prod/

- Click on the **Wireless Network Connection** icon on the right side of the taskbar (near the volume icon)
- Click on the **psu** network and then click the **Connect** button

  ![Wireless Network Connection](image1)

  - Two windows will pop up
  - Type your **PSU Access Account** and **password** and click **OK**
  - You’re connected!
