Background
The Project given to sketch a concept for a nontraditional house complete with both living and luxury features for the client. The parameters were as follows:

- Minimum 4-5 rooms (living room, kitchen, bathroom, bedroom, dining room, etc.)
- At least six windows and two exterior doors
- Furniture as needed, such as beds, sinks, dressers, couches, tables, chairs, TVs, etc.
- A lawn and scaled shrubs that completely surrounds the house.
- At least three different type trees/shrubs in the yard.
- An exterior patio, pool, Jacuzzi, play area, tennis courts, putting green, etc., etc.
- A sidewalk & driveway
- A really cool something unusual or unique, but appropriate, in the design.

Design Concept
This house design was made to be built as a vacation home for leisure and functionality. The theme of the house is very vibrant with natural tones which should come across to the client as unique and enjoyable. The entryway was designed for royalty and the outdoor living space was made to be enjoyed by visitors and owners alike. This house could even be seen as a beach house for the client.

Project Description

Exterior View
VIEW 1 clearly shows the design of the front exterior of the house. Some important features that should not be looked passed are the unique shape of the house, the stone house finish, and the unparalleled curvature of the roof. The majority of the house is on one level which adds to the nontraditional style of the home. Plenty of landscaping can be done around the house itself as shown by the trees and shrubs included in our design. A basketball hoop is also included in our sketch.

VIEW 2:
VIEW 2 shows the rear exterior of the house as well as the patio and pool area. Below the second floor kitchen and dining area, there is a pool, Jacuzzi, and outdoor bar and dining areas. The back also has a stone finish and a wooden deck with a sliding door to the main bedroom.

**Interior View**

**VIEW 3:**

VIEW 3 shows the interior of the house complete with a grand entryway, fountain, and staircase. On the main floor, there are 3 main rooms and the grand entryway to accommodate your needs. A master bedroom is the largest room on the floor, whereas the bathroom is the smallest by a decent margin. There is also a main living room with a fireplace and lounging furniture. The upper floor is offset from the main floor and is the home to the kitchen and dining area.

**Fees**
