OBJECTIVE:

- Interested in an industrial engineering position in an engineering firm.
- I want to utilize my creativity and design skills to come up with unique creations.

EDUCATION:

- Graduated from Central Bucks West High school. (3.79 GPA)

EXPERIENCE:

- For my High School graduation project, I worked with a well-known architect in my hometown.
- I followed her around to some of her job sites in the preliminary, on-going, and finished stages.
- After gathering up enough background information, I set out my own project of re-designing my Uncle's burnt down farm house in both current and future conditions on Google Sketch-Up. (100-120 hours of work)

ACTIVITIES:

- Played baseball all my life (pitcher), using all kinds of strategies to help improve my craft just like an engineer would. Whenever I found myself in a rough situation, I had to try and work my way out of it and problem solve just like an engineer would.
- Member of the Snowboard Club here at Penn State University

HONORS/AWARDS:

- Captain on several sporting teams.
- Won a baseball scholarship awarded from my High School.

SKILLS:

- Pretty good understanding on how to work with the Google Sketch Up software.
