

CALCULUS II
MATH 141
SUMMER 2016
COURSE SYLLABUS

PROFESSOR: Dr. Daniel Joseph Galiffa

E-MAIL: djg34@psu.edu

OFFICE PHONE: 814-898-6090

WEB PAGE: <http://www.personal.psu.edu/djg34/>

OFFICE: Benson 86

OFFICE HOURS: Mon., Tues. and Wed. from 10:50-11:50AM,
& by *appointment*

CLASS DAYS, TIMES & LOCATIONS: Mon., Tues., Wed., Thurs. and Fri. from
9:00-10:45AM in Nick 166

IMPORTANT DATES:

- DROP PERIOD ENDS: JULY 5
- ADD PERIOD ENDS: JULY 6 (8:00AM)
- LATE DROP BEGINS: JULY 6
- LATE REGISTRATION BEGINS: JULY 7
- LATE DROP DEADLINE: AUG 2
- WITHDRAW DEADLINE (CLASSES END): AUG 10
- Independence Day: July 4 (no class)

Note: Please refer to the PSU policies regarding adding, dropping or withdrawing from a course before a decision is made and/or attend my office hours.

TEXT: *Calculus of a Single Variable: Early Transcendental Functions*, Sixth Edition; by Larson & Edwards

COURSE TOPICS: Course topics will essentially be selected from the following subject areas:

1. Applications of Integration
2. Integration Techniques
3. Infinite Series
4. An Overview of Conic Sections, Parametric Equations, Polar Coordinates and Partial Derivatives

GRADING: There will be three areas that will comprise the student's final grade:

1. **Examinations:** There will be a number of exams and the topics of which will be related to the subject areas as described above. More specifically, the exam problems will come from the relevant lecture material, the assignments, the quizzes and the text. Students will be given one class period to finish each exam. Examination dates will typically be announced in class at least one week before the exams are administered.
2. **Quizzes, Assignments & Projects:** There will be several quizzes that will cover the material discussed in lecture and the material from the assignments and the text. The nature of each quiz may vary; e.g., a 'standard' quiz, a pop quiz, group quiz or possibly a take-home quiz.

Throughout this course, there will also be a number of assignment and project sheets passed out in a timely manner, which will comprise various relevant problems, primarily from the text. Each assignment sheet will have detailed instructions for completion. Students are permitted to collaborate with other members of "this" class (and no one else) as long as their collaborators are documented. Working with anyone outside of this class on graded quizzes/assignments will *violate* the Penn State Erie Academic Integrity Policy, as paraphrased herein. Students are of course *enthusiastically* encouraged to bring any inquiries regarding the assignments (individually or in groups) to my office for assistance and advice.

3. **Final Examination:** There will be a *comprehensive* final examination.
4. **Attendance:** Daily attendance will be taken. A student must be present for the duration of the class to receive credit for attendance.

There will be no make-up quizzes or examinations unless students have a *legitimate* excuse or a documented PSU event. Also, each examination will consist of a total of 100 (percentage) points with a 5 point bonus problem and there will also be additional bonus opportunities throughout the course.

Note: To attain full credit on any graded problems, sufficient work must be shown. Graphing calculators will not be permitted on quizzes or exams, nor will they be used in class. However, the use of such calculators may be beneficial as a learning aid (I personally recommend the TI-89 Titanium™, the TI-Voyage™ 200 or the TI-Nspire™). For assistance in using these devices, please feel free to come to my office hours.

GRADING SCALE:

A	≥ 92
A-	[90, 92)
B+	[88, 90)
B	[82, 88)
B-	[80, 82)
C+	[78, 80)
C	[70, 78)
D	[60, 70)
F	[0, 60)

FINAL GRADE: A student's final grade will be determined as follows:

- Exam Average: 60%
- Quizzes, Assignments & Projects: 25%
- Comprehensive Final: 10%
- Attendance: 5%

ACADEMIC INTEGRITY: The Penn State Erie policies on academic integrity will be **strictly enforced**. Academic integrity is a basic guiding principle for all academic activity at the University, and all members of the community are expected to adhere to this principle. Specifically, academic integrity is the pursuit of scholarly activity in an open, honest, and responsible manner. It includes a commitment not to engage in or tolerate acts of falsification, misrepresentation, or deception. Such acts violate the fundamental ethical principles of the University community and undermine the efforts of others.

Violations of academic integrity are not tolerated at Penn State Erie. Violators will receive academic sanctions and may receive disciplinary sanctions, including the awarding of an XF grade. In cases such as these, an XF grade is recorded on the transcript and states that failure of the course was due to an act of academic dishonesty. All acts of academic dishonesty are recorded so those repeat offenders can be sanctioned accordingly. For a more complete description refer to the URL below.

*"I wish everyone success in this course and look forward to **ANOTHER** productive semester!"*

DISCLAIMER: At anytime in this course the aforementioned statements of the syllabus may be amended at the discretion of the professor Dr. Galiffa. If this is to occur, students will be notified in a timely manner during a regularly scheduled class period only. It is the student's responsibility to ascertain this information in the case of an absence.
