Concept Design Report

Background

This project is a conceptual design for a very modern, elegant house. If this design is approved by the client, this invoice will be put into motion and the building process will begin. To design this house, my company needed to learn how to use the program SketchUp Make 2016, which is a very tricky, sensitive program – not an easy learn. That said, this company is willing to do anything for their clients and have learned it, prior to the design process. We then designed this modern house off many aspects of several currently built modern houses

Design Concept

This house design is several modern styles put into one, the main style being international modern with a flat roof and flush windows. The theme of the house is plain, simple, relaxing colors to promote peace and relaxation. The house has a very large kitchen and family room along with a living room, walk in bathroom, play area, bedroom, and several exterior patios. This house is located in a remote area of Michigan, where wildlife and nature is very close to the home. This location adds on to the relaxation theme. In summary, this luxurious house is supposed to be enjoyed in a peaceful setting and mindset.

Components of the Project

This seven room house has a kitchen/dining area, family room, living room, bathroom, play area, plain area, and a bedroom. The kitchen has refrigerators, sink, dishwasher, and many cabinets. There is also a dining area with table and chairs. The family and living rooms have multiple places to sit and relax along with T.Vs and an indoor Jacuzzi. The bathroom has a shower, mirror, sink, cabinets, and toilet. The play area has a foosball and ping pong table. The bedroom has a bed, desk, dressers, and T.V. There are multiple windows and doors of all shapes, styles, and sizes which adds an interesting perspective to the house. There are also multiple decks and a patio with sitting furniture and a grill. There is a nice driveway and sidewalk along with a fully landscaped yard with many different types of trees and shrubs.

Project Description

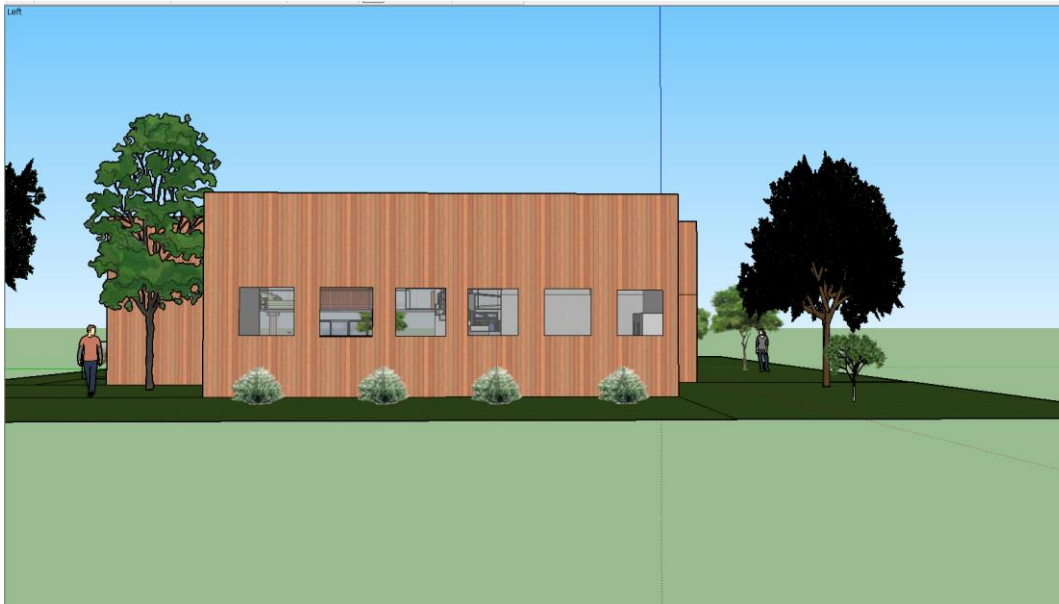

Exterior View

View 1:

This is the front of the house. The front door is in between the wooden pillars. There is a garage to the left of that and a deck above the garage. To the right of the front door is an outdoor patio with furniture and a grill. You can also see the bedroom and the family room through the windows at this angle.

View 2:

This is the back of the house. The windows and shrubs are arranged in an appealing way along with the trees. On the right of the house in this picture is another deck.

Interior View

View 1:

This is the inside of the house. To the very right is the kitchen. Moving left is the family room and above is the plain area with access to one of the decks. Below the plain area is the family room with a large couch. Moving left is the play room with access to the other deck above the garage. Continuing to move left is the bedroom. Below the bedroom is the living room, with a jacuzzi. Under the play room is the walk in bathroom with opaque glass.

View 2:

This is a different angle of the inside of the house. To the left is the kitchen. Moving right is the living room. You can also see the outside deck on the side of the house with the red table and chairs. You can also see the play area and hallway to the bedroom.

Fees
