

Concept Design Proposal

View 1

View 2

These two images feature the exterior of the house. In “View 1” the image shows the front face of the house. From the street, you can access the large the driveway and enter the home through the wooden garage or front door. The surface of the home is covered in stone and there are floor length windows connecting the two main parts of the house. Graveled stone surrounds the house and walkways. “View 2” reveals the large backyard patio. This backyard is made to entertain guests with an outdoor kitchen, fireplace, and pool.

View 3

View 4

These two views reveal the interior of the house. “View 3” is pictured from the front of the house, or the street. If you walk in the front door, to the right is the dining room and to the left is the master bedroom also seen in “View 4” (from the point of view behind the house). The master bedroom includes a walk in closet and master bathroom. Continue into the house and you will be led right into the living room and kitchen. Behind the living room is a laundry room and powder room. You can directly access the patio from the living room. In the other portion of the house, there are two bedrooms sharing bathroom. Adjacent to these is the spacious two-car garage.
