Chernobyl Human Disaster

- Very Few Safety Precautions
- Emergency Shut Down Off for Test
- Lots of Steam Produced too Quickly
- No Warning to Local Communities
- Allowed the Reactor to be Worked with
- Poor Design Allowed the Reactor to Rupture

- Reactor Explosion
- Release of Radioactive Materials
- Fire Caused by Explosion
- Designed to Produce Lots of Energy, Little to no Safety

- Fallout Insued all over Russia and Europe
- More People (firefighters Mainly) Exposed to Radiation

Very Few Regulations by International Authorities
Few Ways to Warn Nearby Towns of Disaster
