## Objective

As an aspiring double major graduate of The Pennsylvania State University, I am no stranger to hard work and diligence. I wish to pursue a career nuclear engineering, providing clean and abundant energy to the nation and the world. Over the past few decades nuclear energy has gained a negative stigma due to safety concerns and waste materials, albeit I strongly believe that it is the future of energy production. I wish to apply my knowledge to improve the nuclear field, to increase both production efficiency and safety.
