

Supplying customers with a cheaper, more reliable alternative to modern products is our goal.

With a young new team of engineers thinking outside the box we strive to improve upon and bring about change to everyday products. Striving to create new or improved products that will revolutionize how you see products and what you expect out of them is our goal. We take what you're familiar with and like, then revamp it to create something you are comfortable with and LOVE.

Current Concept

At current, the Trinity Engineering team is taking a unique approach to the classic car seat and stroller. The CarStoller is a dual purpose car seat and stroller combination. Unlike our competitors, there is no need to struggle with attaching an entirely semi stationary car seat to a stroller. This design requires a customer to purchase both an independent car seat and stroller that our compatible. Our Engineers are hard at work designing a means to allow the user to easily transition from a car seat to a stroller in one easy action. The completion of this innovative product will bring a new light to what anyone from new mothers to pet owners
