

## Interests

My interests include:

- Bowling- I have been bowling in a league for fourteen straight years on Saturday mornings. It is definitely my favorite sport by far and my average is about 175, with a high game of 257 in my lifetime. I someday wish to bowl for Penn State.

- Golf- I have been playing golf for four or five years. It is very fun but very challenging. I am pretty good but not great at it, but my dad, brother, and we can do it as a family, which is fun.

- Time with Family and Friends- I grew up always spending a lot of time with my family at dinners and house parties on holidays. I always enjoy getting together with them and hanging out. I also love hanging out with my friends. Being in college allows for many new friendships and also many activities to do with friends.

- Humor- I use humor all of the time because I am optimistic. I always love making people laugh and keeping the mood happy and light wherever I go, when it is appropriate. I always like to have a constant smile and humor helps me do just that.

- My academics are definitely one of my interests. I have always taken pride in my academics and enjoyed school. I plan to study hard and get the best job possible in order to live a comfortable life doing what I love.
