Engineering Drawing

During the duration of this course, I learned the fundamentals of engineering drawing and graphics. Some of the topics that I investigated are outlined below.

**Multi-View Drawing:**
When presented with a 3-Dimensional image, I learned how to create a three-view sketch, which included the projection of the top, front, and right faces of the object.

**Isometric Drawing:**
I learned how to create the detailing of a 3-Dimensional figure when I was presented with only the three-view sketch of the figure.

**Dimensioning**

**Cylindrical Surfaces**

**Section Views**
