Remember Burchill's?

Let's go back to 1975 and recall a little about the George Burchill Lumber Company.

The origin of the lumber company was started on December 1, 1892, by the Burchill family. President John L. Burchill and William J. Burchill ran the business. The company was incorporated in 1915 and for many years was occupied by the H.O. Burchill Company. As the building known as the H.O. Burchill Company (presently January) was built in the 20th century, by 1925 to start it. The carpenters working for the Burchill Company also built a large threshing machine that was used as a field in the Old Home Week Parade. This was made in one day—another record! The piece of wood was used by the Hazel children for many years.
