Cancer session

The cancer relief drive was sponsored by Zion Belles on June 25-26. The Cancer session was held at the Zion Lutheran Church. Close to 99,000 Americans will be diagnosed with cancer this year alone. The cancers are caused by two factors: (1) a genetic history and (2) lifestyle. The genetic factors are not preventable, but lifestyle factors can be controlled. Cancer is the second most common cause of death in the United States, and it is the leading cause of death for women. The American Cancer Society urges us to be proactive in our health care. The goal is to catch cancer early, before it has spread, and to prevent cancer in the first place.
