Sustainability of Technology
Personal Slide (Robert)

“There’s no dollar sign on a peace of mind”

• Remaining close to my family and maintain friendships I have made throughout my life
• Career as a Chemical Engineer
• Look to make the world a better place for all of us to live
• More small business, less government
  • Self-sustained America
Environment Sustainability

• Views of our environment-

Faster, smarter, smaller, and more efficient

Increase in fulfilment of psychological and physical needs
Environment Sustainability

- Ecological - wind turbine, and solar panels, fracking
- Economic - online banking, managing stocks, advertising
- Social - Facebook, Twitter, Instagram, Cell Phones
Where We Were vs. Where We Are Now

Communication
• House phones → Twitter

Travel
• Horse and Buggy → Electric Car

Business
• Market Shopping → Online Shopping

Environmental
Destroying Ozone → Recycling
Personal Slide:  **Matt**

a. **State of Mind:** I hope to be in a stress free, confident state of mind over the course of my adult life.

b. **Social Life:** I hope to get married, and have a few kids when I get older. I also hope to remain close to my best friends even as we go on to our own “bigger and better” things.

c. **Material Life:** Own a house of my own, preferably somewhere near my home town of Berwick.

d. **Career:** Become a successful mechanical engineer

e. **Recreational:** I want to stay religious and carry on my hobby of playing golf.

f. **Politics:** Stay as far away from politics as possible.
Automation

• As technology advances, it gives companies more opportunities for automating their processes.

• Automation Increases:
  o Production Speed
  o Production Rate
  o Efficiency
Business Over the Web

- Doing long distance business has become much easier as technology has advanced:
  - E-mail
  - Web Conferences
  - Online Trading
Advertising/Social Media

• Technological advances also make it much easier for businesses to advertise and expose their product to the public.

  o TV commercials
  o Social Media
  o Online Advertisements
My Life (Megan)

• State of mind: successful, happy
• Social Life: husband and children, maintaining a strong relationships with family and friends
• Material life: own a house in Massachusetts
• Occupation: high status in a company with a mechanical engineering degree
• Want a peaceful world in which we work together to lead an innovative and sustainable life style
Ecological and Economical Improvements
Wind Turbines and Solar Panels

- Sustainable
- Environmentally friendly
- Cost effective
Electric Cars

- Innovative society
- Energy efficient
- Environmentally friendly
- Reduce dependence on fossil fuels
- Higher satisfaction with performance benefits
