CAD LAB

Throughout the semester we have been introduced to Solidworks, which is a solid modeling computer software design that let engineers to create their designs on the computer in an easier way. We were taught how to use some tools of it such as:

- **Extruded Boss**

![Extruded Boss](image1)

- **Revolve**

![Revolve](image2)
- **Sweep**

- **Loft**
- **Fillet/Chamfer**

- **Extruded Cut**
- **Shell**
