O	1	23	8
C	84	38	78
E	33	57	53
A	76	50	50

Our group is decently high in Neuroticism. We may have some trouble getting work done. We need to make ourselves in a good mood and willing to do any work. With our low scores in Openness, we may have trouble coming up with new creative ideas for design projects. Our conscientiousness scores are relatively high. This will help us get things done on time. Our scores on Extraversion are about average, so we shouldn't have any problems working with each other. Our agreeableness scores are a little high. This is good because we should all get along fine and be able to work together very efficiently.
