Objective: To obtain a job that uses the experiences I have learned for Chemical Engineering as well as to increase my experience in that field.

Education: High school Diploma from 2011 with 4.6 weighted GPA and 3.8 unweighted. Taking courses in Organic Chemistry, Calculus 3, and Engineering Design currently.

Experience: Volunteered at a children's church camp requiring focus and constant supervision.

Activities: Ran at college and high school which required dedication, time management, and focus.

Was on a FIRST Robotics team and helped to program and build the robot, mostly wiring. Placed 3rd at the national competition junior year.

Competed on Math Team in High School.

Joined Computer Club in High School sophomore year and participated until graduation.

Skills: Able to focus for a long time on a single problem.

Able to problem solve well and work in teams.

Skilled in Math and Chemistry.
