Seeking a position as a Hazardous Waste Response Specialist.

### **Summary**

- Conducted simulated response to hazardous materials (HazMat) accidents at a regional level.
- Trained and evaluated small, medium and large teams in hazardous materials accident response
- Solve problems through analytical thinking and open-minded ideas.
- Certified through multiple federal agencies to respond to hazardous materials accidents.
- Certified through multiple federal agencies to train and certify Hazmat response team members

### **Experience**

#### **Instruction**

- Developed curriculum for the training of small, medium, and large groups of employees in hazmat safety.
- Developed instructional materials for the assistance of training employees.
- Evaluated employees in the retention of instructed information.
- Certified small, medium, and large groups in HazMat response operations.

#### **Response**

- Responded to multiple simulated HazMat accidents on a regional level that required coordination with multiple different federal agencies.
- Responded to multiple HazMat accidents on a local level that required investigation and evidence collection.
- Employed multiple sensitive pieces of equipment in the response of HazMat accidents that helped to identify and quantify the scope of the accident.
- Processed over 2000 personnel through a decontamination line in efforts to reduce the spread of the accident.

#### **Investigation**

- Collected evidence from multiple scenes in the process of analyzing the events leading up to a HazMat accident.
- Interviewed witnesses of the accident to piece together the events leading up to the accident.
- Wrote reports that described in detail the procedural discrepancies that lead to the accident.

## **Consult**

- Advised supervisors on federal regulations and standards.
- Developed procedures that are in compliance with federal regulations and standards.
- Coordinated with multiple federal, state, and local agencies for the response during a regional HazMat incident.
- Provided medical information to first responders on what symptoms might be exhibited and how they can be treated effectively.
