

Team Page of Jordan Janinek, Evan Bedel, Sam Schmucker, and Matt

We have taken the BIG 5 Survey to understand our strengths and weaknesses. Below are the results of the survey in a radar plot. Some of our strengths include our variety in neuroticism, reliability, and our willingness to work with and without people. Neuroticism helps some of us because we will not easily be influenced by stressful activities. The other members will become stressed from certain tasks which will then help the group set timetables and accomplish tasks. Most of us are reliable so we can count on each other to get things done on projects. We have a very consistent balance between working with and without a team. This will ensure that we can solve problems together and also work together because we are very agreeable. Some of our weaknesses include our lack of openness and lack of creativity. We like everything plain and simple and do not enjoy breaking the routine. We also lack creativity which hinders our ability to think outside of the box. We hope that we can overcome our weaknesses and be an effective design team.
