

Objective

To obtain a chemical engineering internship for summer 2014

Experience

Pennsylvania Free Enterprise Week

July 29-August 6, 2011

A summer camp that allows students to experience running a business in a simulator. I worked with 15 other peers to create, market, and sell a product in a realistic scenario. I learned the main concepts to running a business and selling a product

Ice Hockey Referee

2007-2013

I officiated the ice hockey games of youth classifications. I learned how to handle myself in front of a crowd of people and how to communicate with others in a professional manner.

University of Pittsburgh Organic Chemistry Seminar

Fall of 2012

I attended the University of Pittsburgh's Organic Chemistry Seminars that allowed me to gain a head start into my learning of organic chemistry. I learned in a classroom setting and also did two laboratory experiments.

Education

Hempfield Area Senior High School

June 2013

I graduated in the top 10% of my class with a 4.0 GPA.

Pennsylvania State University

May 2017

I will be graduating from Pennsylvania State College in the spring of 2017 with a Bachelor of Science, Chemical Engineering degree.

Skills

I know how to use AutoCAD by AutoDesk fairly well. I can also make documents, presentations, and spreadsheets using Microsoft Office. I have a general understanding of how computers work and can do most functions on them with ease. Picking up things and learning how to do them efficiently is another skill of mine.

In high school, I played ice hockey and lacrosse so I have an understanding of what it means to be apart of a team. I also have some experience leading, as I was the captain of my ice hockey team and a member of the National Honor Society.
