

Team 3

After completing the big five survey. Our team has figured out our strengths and weaknesses. Some of our strengths include agreeableness and extraversion. Agreeableness means that our team will be easily able to take conflicting ideas and easily compromise to finalize are decisions with ease. As a team that is extravert we will all be positive, enthusiastic and be able to work off of each other's excitement and energy. While some of our weaknesses include openness to experience and neuroticism.

| Factor | Eric Hill | Tom Mangan | Nick Benelli | Daratu Dergi |
|------------------------|-----------|------------|--------------|--------------|
| Extraversion | 55 | 41 | 41 | 78 |
| Agreeableness | 72 | 69 | 70 | 62 |
| Conscientiousness | 86 | 45 | 31 | 51 |
| Neuroticism | 24 | 32 | 71 | 9 |
| Openness to experience | 11 | 27 | 21 | 10 |

In order to make sure that our group works well and efficiently we will need to make sure that we pay extra attention to our weaknesses. Since our group has very poor openness to experience we will need to make sure that we will all try to do things that may be out of our comfort zone. For example trying to complete tasks or work machines that we have never done or worked with before. In other areas, for example neuroticism we will allow members who have a high neuroticism to help other members in our group improve in that area or to lead the way in that category.
