

# 1965 Ford Galaxie 500 XL Convertible Restoration

I found this car in the country side of Pennsylvania. The car's interior was in good shape but the convertible top was torn and the paint was peeling, not to mention it was purple. However, mechanically the car was in decent shape and the body was solid with minimal rust. The car is currently being restored and modified. The car now has a 550hp 390ci engine and the body has been modified to have sleeker and cleaner lines. The car will be painted Daytona Blue Pearl.
