

HOMEWORK 2

MATH 243

8.1.43

Set up the definite integral by hand and use a calculator or computer to evaluate it. Make sure that your work makes it abundantly clear what expression you asked the computer to evaluate and what the computer told you. Also, don't forget to start by doing the "verify" part of the problem.

10.2.73

You'll have an easier time with your explanation if you copy the diagram and add additional labels and information to it that you can reference.
