ASSIGNMENT 2

The first day of classes we drew a basic block diagram of a cell phone. I want you to do the same for a MP3 player.

Name the different blocks and explain, to the best of your knowledge, how it works. Try to explain the sequence of events that happen when you choose a song and press ‘Play’.

Don’t look online for an explanation of how it works; instead, try to do it from the knowledge that you already have.

You can draw the block diagram by hand for this assignment.
