
Read the article and answer the following questions. Email your responses to Dr. Hollenbeak.

1. What was the primary research question?

2. What type of study? Is this study type appropriate?

3. What were the comparators? Is this exhaustive?

4. What is the measure of effectiveness?

5. What is the cost-perspective? Is this sufficiently broad?

6. What is the ICER in the base case analysis?

7. Would you call the use of coxibs in this population cost-effective relative to NSAIDs?

8. What sensitivity analyses were performed?

9. Were costs measured accurately?

10. How were the timing of costs and consequences taken into consideration?
