**RESEARCH IN THE SCHOOLS**

Information for Authors

**Statement of Purpose**

*RESEARCH IN THE SCHOOLS* (ISSN 1085-5300) publishes original contributions in the following areas: 1) *Research in Practice*—empirical studies focusing on the results of applied educational research including cross-cultural studies, 2) *Topical Articles*—scholarly reviews of research, perspectives on the use of research findings, theoretical articles, and related articles, 3) *Methods and Techniques*—descriptions of technology applications in the classroom, descriptions of innovative teaching strategies in research/measurement/statistics, evaluations of teaching methods, and similar articles of interest to instructors of research-oriented courses, 4) *Assessment*—empirical studies of norm-referenced, criterion-referenced, and informal tests in the areas of cognitive ability, academic achievement, personality, vocational interests, neuropsychological functioning, and the like, and 5) *Other* topics of interest to educational researchers. *RESEARCH IN THE SCHOOLS* is devoted to research conducted in any educational setting from a conventional elementary school or high school to a training program conducted within an industry. Likewise, there are no age restrictions on the sample, since the educational settings may include preschools, continuing education classes for adults, or adaptive skills courses in nursing homes. Studies conducted in settings such as clinics, hospitals, or prisons are ordinarily inappropriate for *RESEARCH IN THE SCHOOLS* unless they involve an educational program within such a setting. One goal of *RESEARCH IN THE SCHOOLS* is to provide a training ground for graduate students to learn effective reviewing techniques. Consequently, the journal utilizes a Graduate Student Editorial Board composed mostly of students in educational psychology and educational research. Members of this Editorial Board, each sponsored by a professor, provide supplementary reviews for a selection of submitted articles, and receive both direct and indirect feedback of the quality of these reviews.

**Preparing Manuscripts**

Authors should prepare manuscripts in accordance with the stylistic rules and guidelines delineated in the *Publications Manual of the American Psychological Association* (4th ed., 1994), which is available from: Order Department, American Psychological Association, PO Box 2710, Hyattsville, MD 20784. Number the pages consecutively. All manuscripts will be subject to editing for sexist language.

**Author Identification**

Authors should put the complete title of the article on the first text page, but they should exclude their names. Subsequent pages should include only a running head. They should prepare a separate sheet with the complete title of the article and their names and affiliations; this procedure will ensure anonymity in the review process. Authors should supply addresses and phone numbers, and electronic mail addresses and fax numbers (if available), for potential use by the editorial staff and, later, by the production staff. Unless otherwise stated, the first-named author will be sent correspondence, galley proofs, copyright forms, and so forth.

**Submission of Manuscripts**

Submit manuscripts in triplicate to James E. McLean, Co-Editor, *RESEARCH IN THE SCHOOLS*, School of Education, 233 Educ. Bldg., The University of Alabama at Birmingham, 901 13th Street, South, Birmingham, AL 35294-1250. Please direct questions to jmclean@uab.edu. All copies should be clear and readable; dot matrix is acceptable only if it meets these qualities of legibility. Length of the manuscripts, including references and tables, should ordinarily range from about 10 to 40 typed, double-spaced, 8-1/2 X 11-inch pages, using 11-12 point type. Abstracts are limited to 125 words. Brief reports of research are not encouraged. Authors are encouraged to keep a hard copy of the manuscript to guard against loss. It is assumed that all manuscripts submitted for publication are original material and have not been simultaneously submitted for publication elsewhere. When manuscripts are accepted for publication, authors are encouraged to submit the final version on a computer disk along with the hard copy.

**Copyright and Permissions**

Authors are granted permission to reproduce their own articles for personal use. Others must request permission to reproduce tables, figures, or more than 500 words of text from the editors. Copyright © 1998 by the Mid-South Educational Research Association.
